

Signature

*We design modular, durable and aesthetic retail systems.
That transform product presentation into sales experience.*

ISOLA

Built from natural materials to combine structural strength with a warm and authentic retail aesthetic.

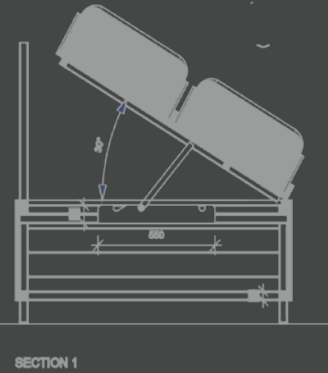

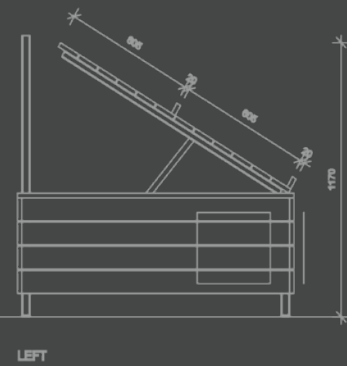

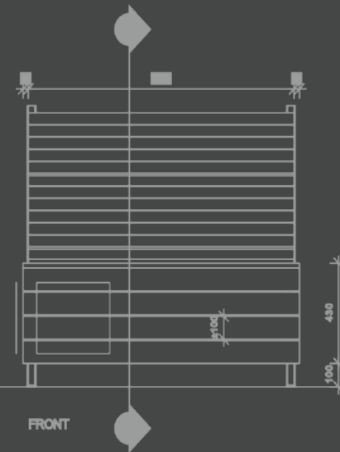

Designed to elevate fresh produce presentation, it transforms everyday shopping into a more inviting and memorable experience.

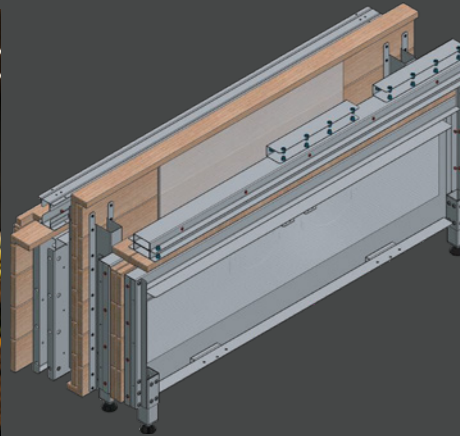

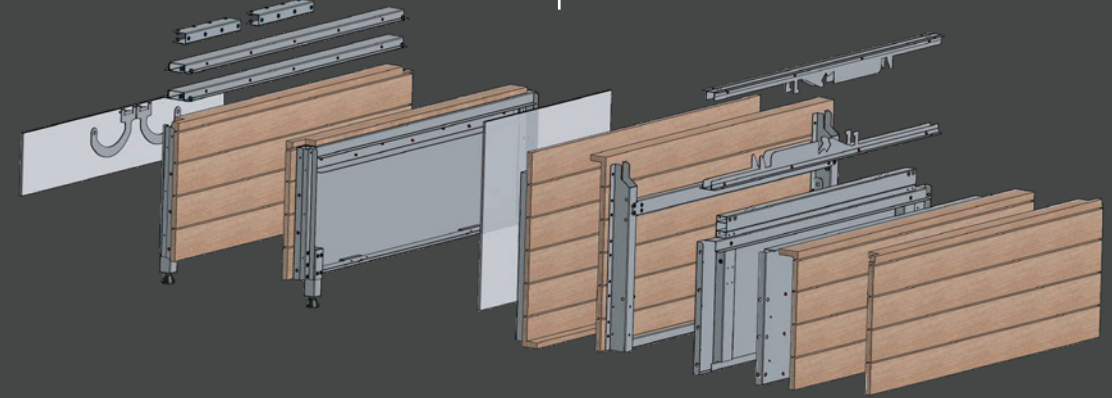

EDULIS

Crafted from natural materials to deliver durability and a refined, authentic retail look.

Designed as a modular knock-down system, it offers quick assembly, compact packaging, and logistical efficiency without compromising display quality.

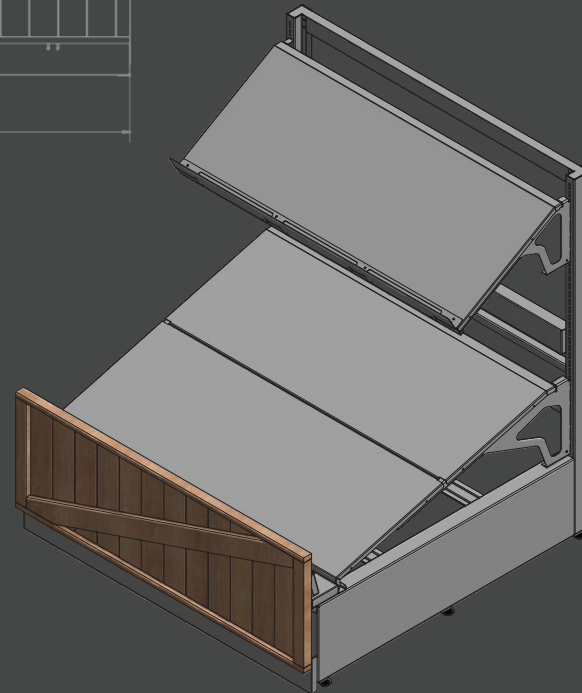

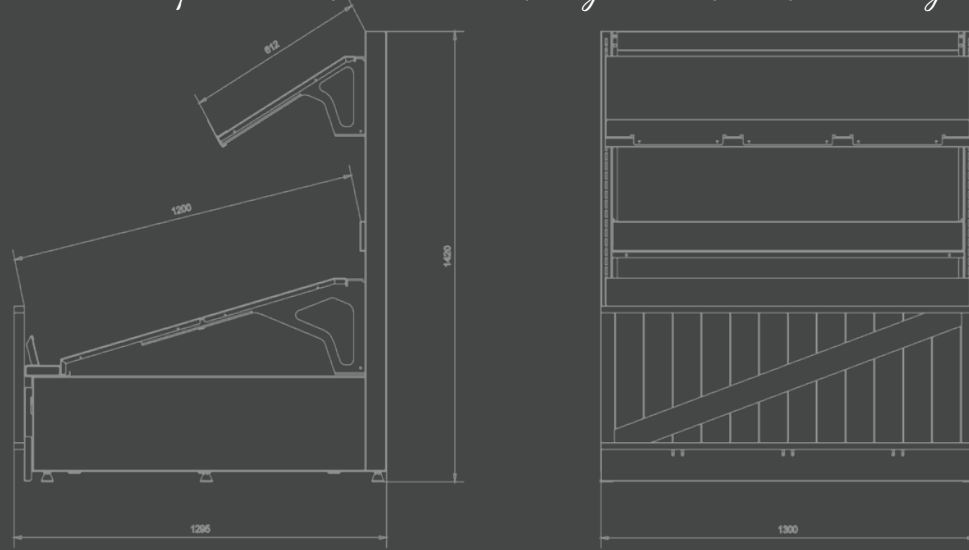

EDULIS

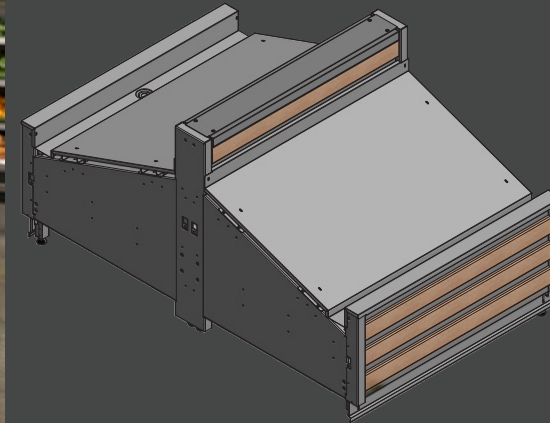

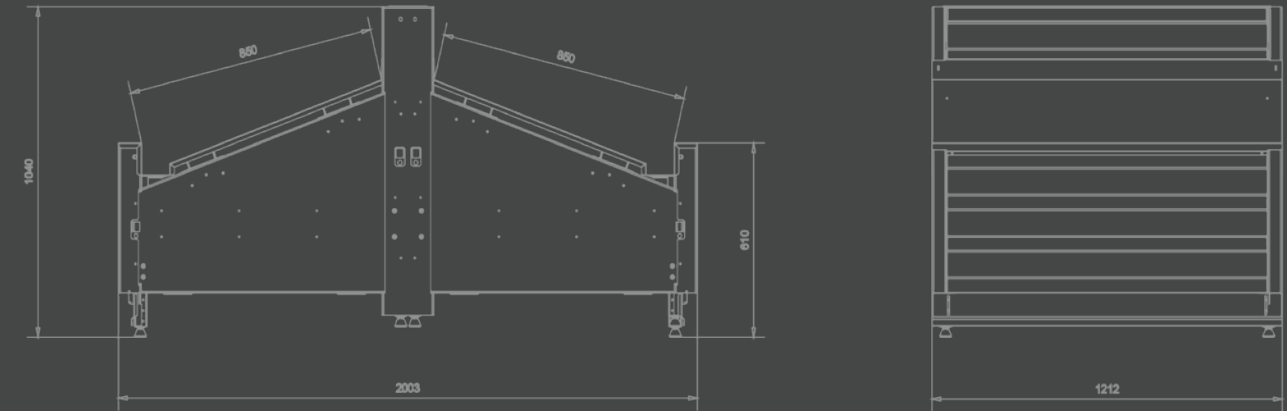

AGRONA

Built with a combination of durable metal structure and warm wooden detailing, this fresh produce display unit brings a natural and inviting character to retail spaces. Its inclined shelving system enhances product visibility, allowing fruits and vegetables to be presented in a clean, organized and visually appealing way.

VERDORA

Engineered for practical use, this display unit offers easy integration into various store layouts with its modular and space-efficient design. Its angled presentation surfaces improve product exposure while supporting quick replenishment and smooth in-store operations.

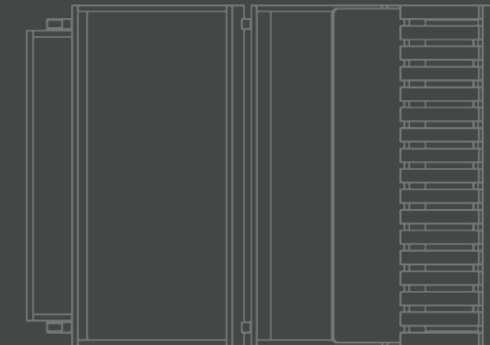

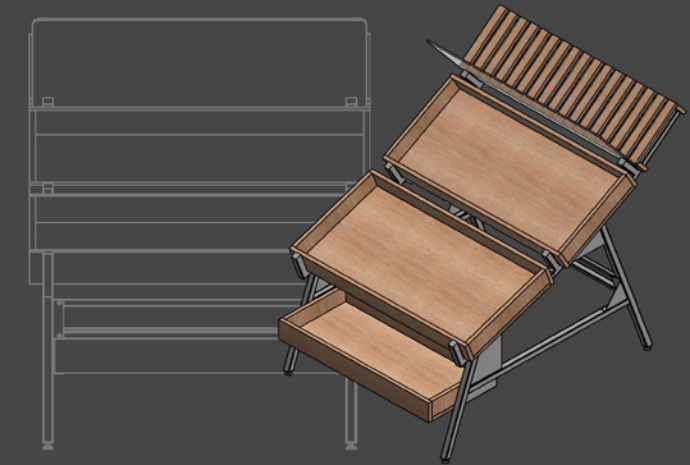

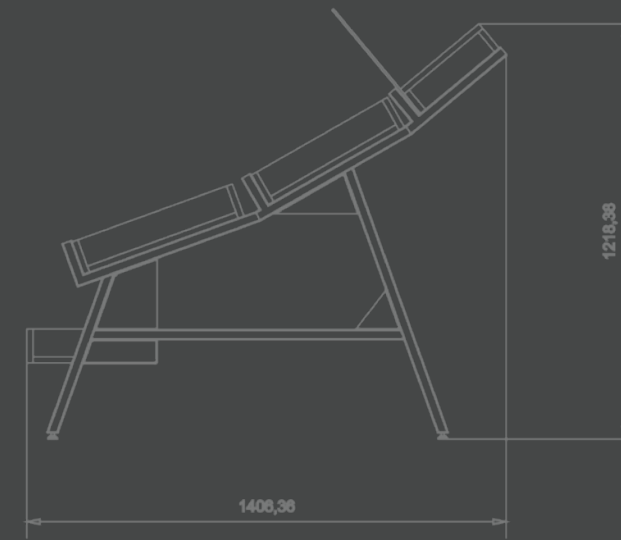

GRANORA

Engineered with a smart modular structure, this display unit is easy to assemble, transport, and adapt to changing retail needs.

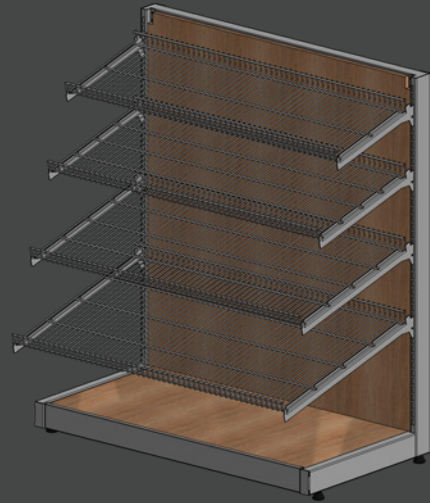

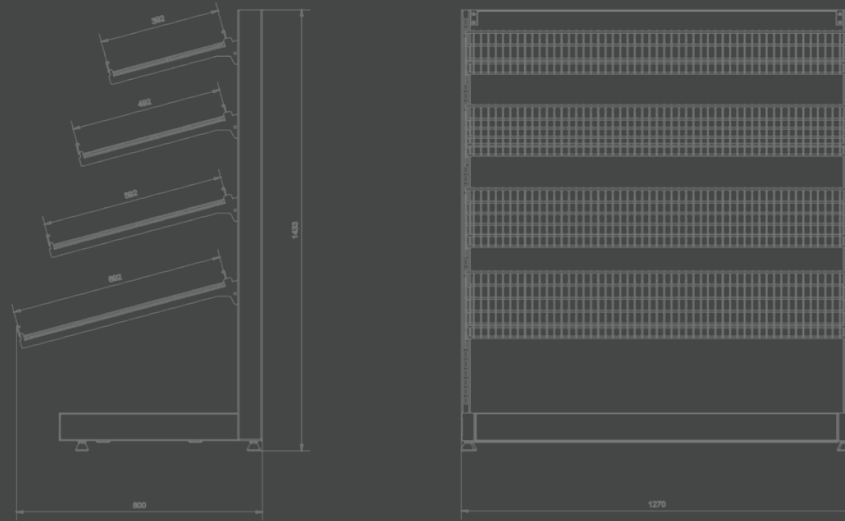

Its natural wood trays and inclined presentation system maximize product exposure while delivering a clean, efficient and space-saving merchandising experience

PANEXA

Designed to present packaged bakery products with clarity and structure, this display unit combines a durable metal frame with warm wooden back panels for a balanced retail aesthetic.

Its multi-tier wire shelving system ensures maximum product visibility while maintaining a clean, organized and easy-to-shop layout.

PANOVA

Crafted from natural wood, this central display table brings warmth and authenticity to bakery presentation. More than a display, this unit creates a sensory retail experience where texture, it turns everyday bakery products into a visually engaging and memorable presentation.

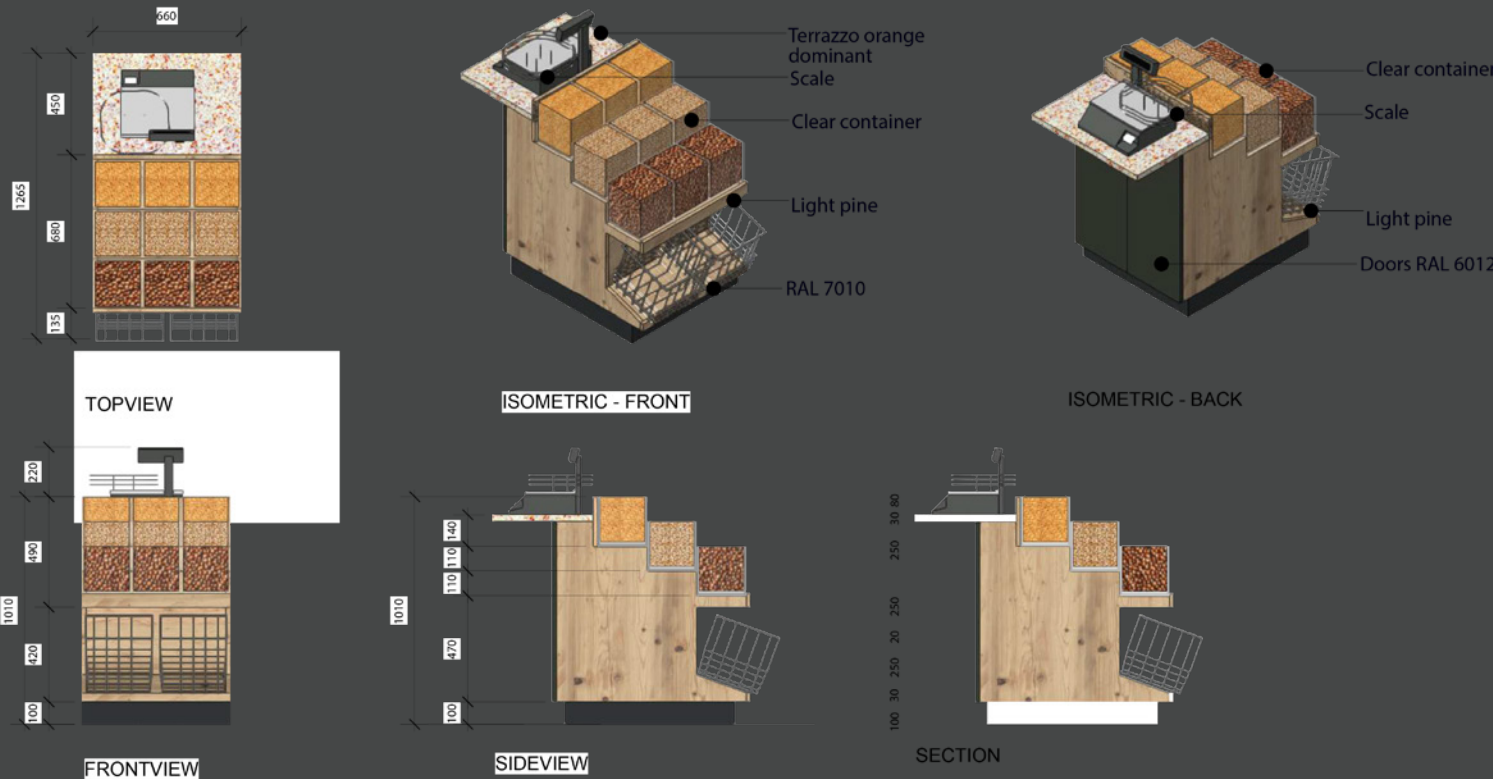

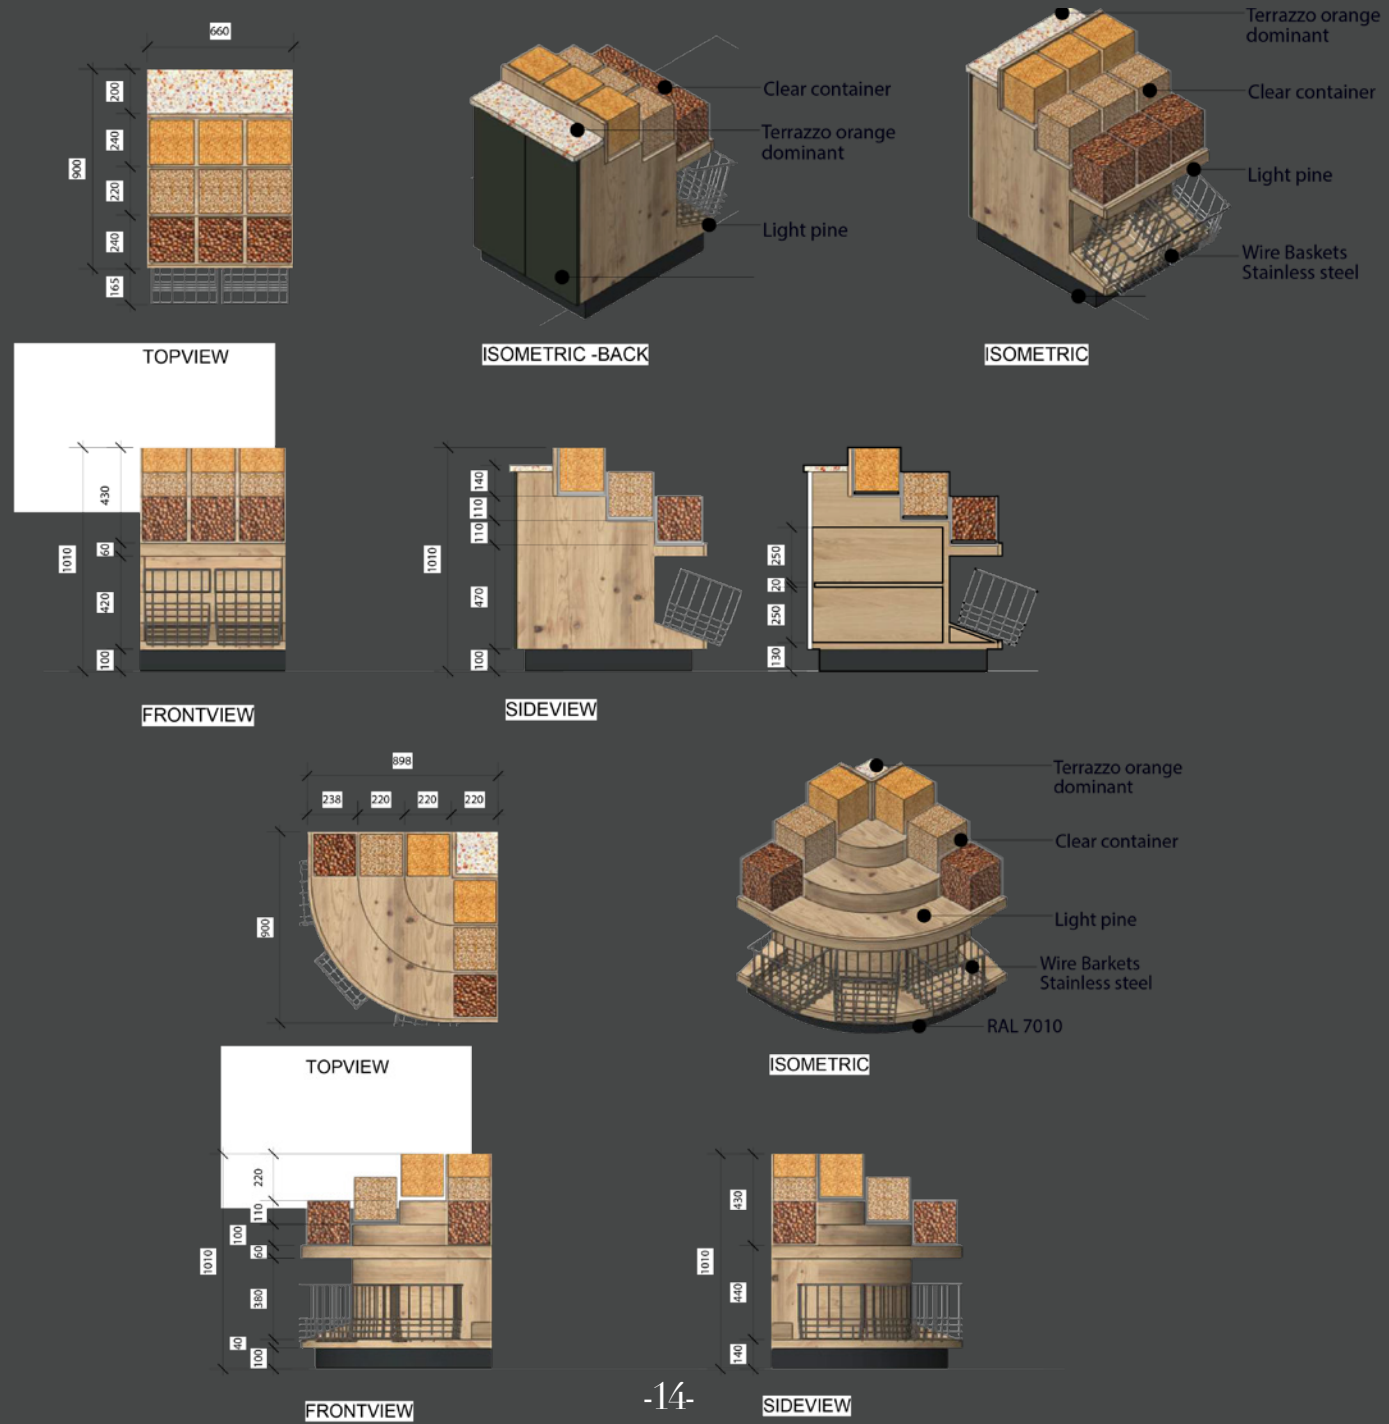

GRANELA

A refined centerpiece that transforms bulk food presentation into a sensory retail experience.

With its natural wood body, granite surface and sculpted tiered form, it creates a strong visual rhythm while celebrating the richness of natural products.

GRANELA

TAVOLA

Our display tables are produced from natural materials with a focus on strength, flexibility, and visual impact. Designed specifically for your needs, they enhance product visibility and turn presentation into a powerful sales experience

VINEXA

A refined wall display system designed to elevate wine presentation with depth, rhythm and clarity.

Combining warm wooden textures with integrated lighting, VINEXA transforms vertical space into an elegant and immersive retail experience.

VINOLO enhances customer interaction by presenting bottles at the perfect viewing angle.

Its modular compartments and ergonomic design ensure easy replenishment and efficient use of space.

VINOLO

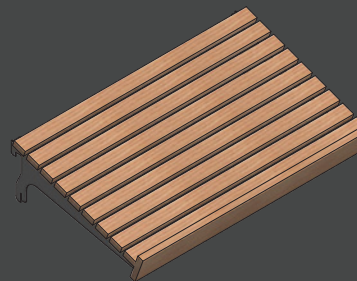

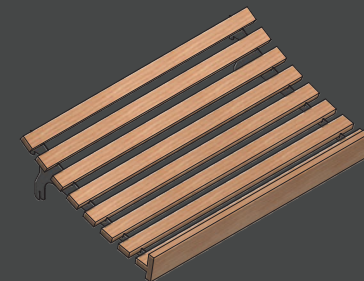

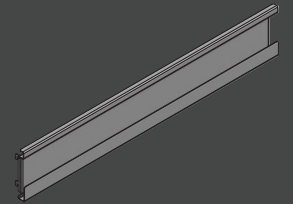

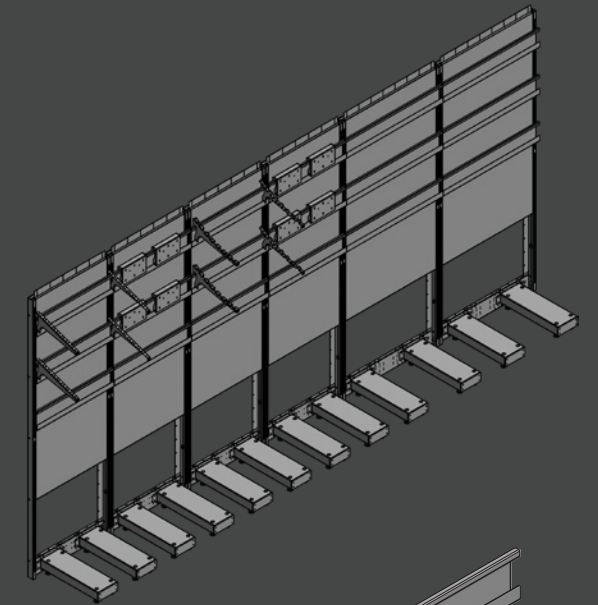

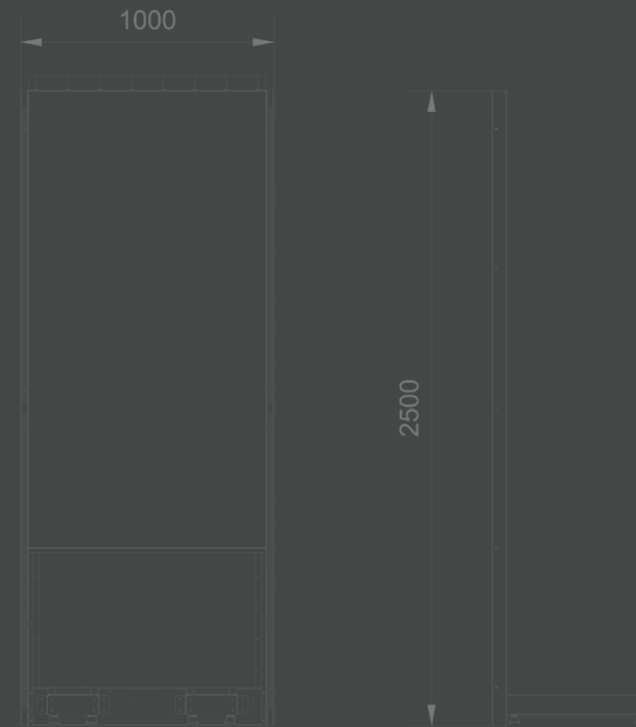

NUTREX

A refined display solution that blends natural textures with modern retail functionality.

Its layered shelving and integrated signage panels create a clean and visually balanced retail experience.

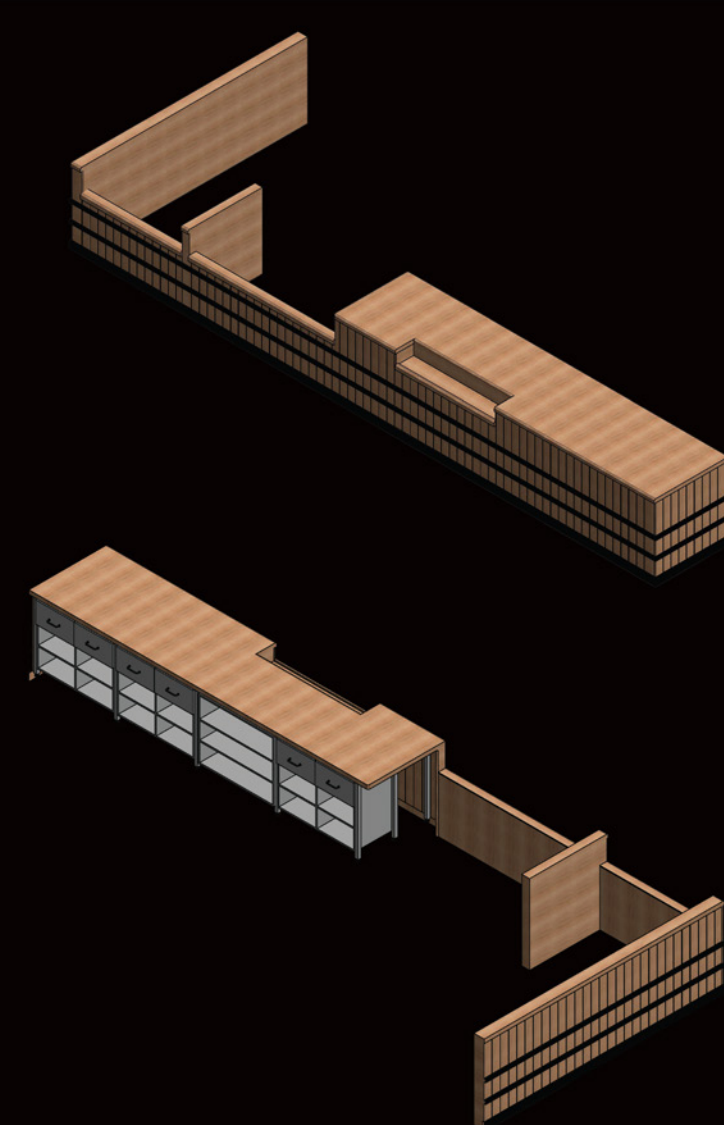

Engineered for efficiency, this unit supports organized product grouping, fast replenishment and easy maintenance.

GUSTEXA

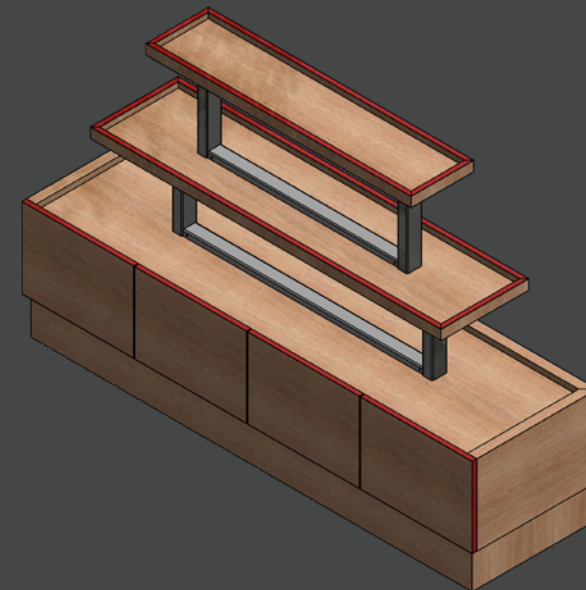

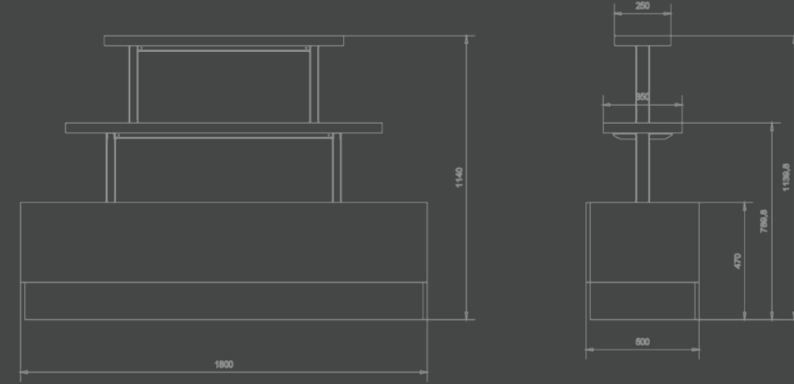

Developed specifically for the given space, counters system adapts to unique layout requirements and material preferences. Blending industrial strength with natural textures, it creates a sophisticated and durable environment for service and preparation areas. Its customizable configuration ensures seamless operation while maintaining a clean and organized working environment.

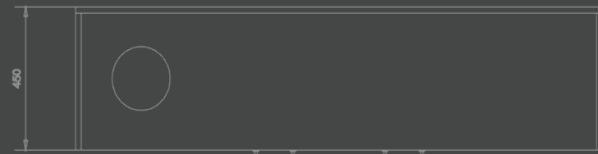

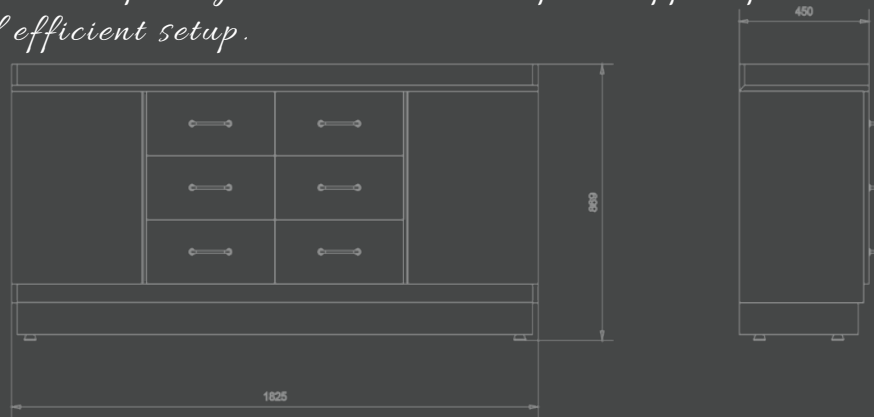

BREXIA

A sculptural centerpiece that transforms everyday products into a curated retail experience. Open and accessible layout encourages browsing while supporting impulse purchases in high-traffic café settings.

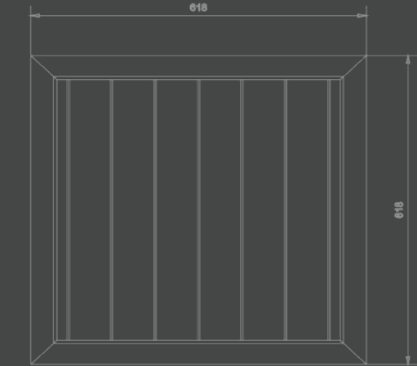

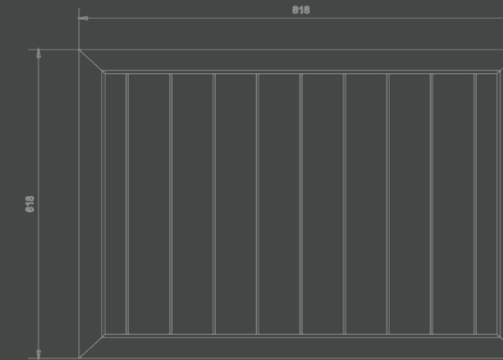

BARITEXA

Designed as a dedicated coffee service station, this unit enhances the customer experience by creating a clean, organized and inviting preparation area. Integrated drawers, waste opening and wide work surface support fast service while maintaining a tidy and efficient setup.

CUBIXA

Modular composition supports efficient arrangement, easy replenishment and a consistently organized presentation. With its solid wooden structure and balanced proportions, it transforms everyday product presentation into a warm and memorable retail experience.

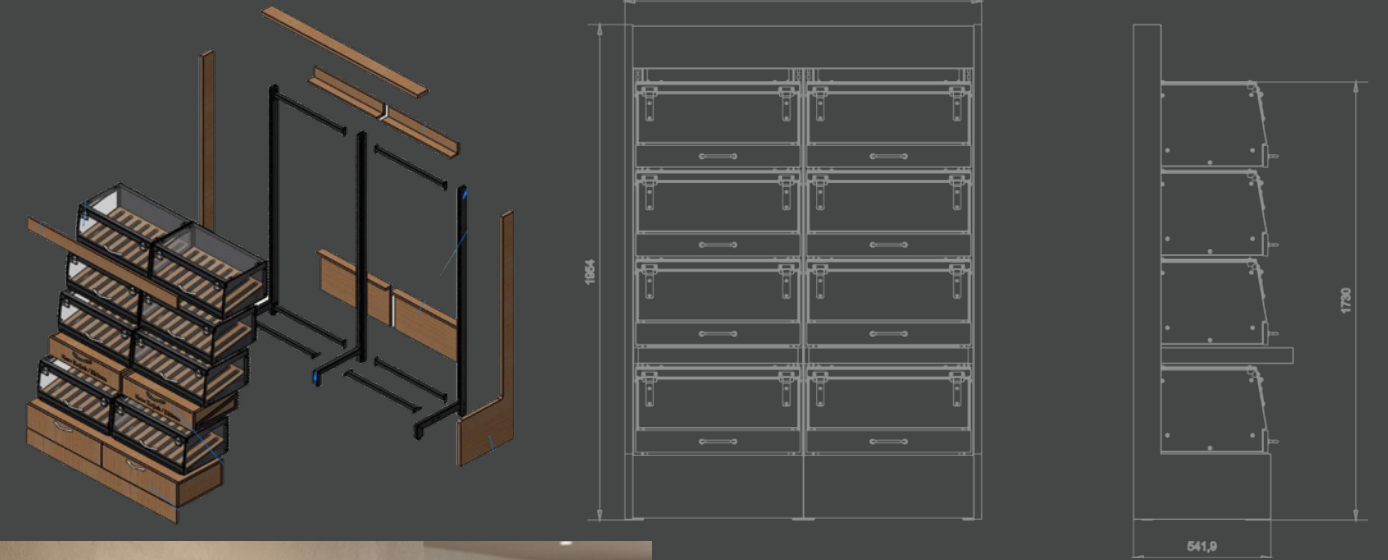

FAMAS

Manufactured from natural wood, this display unit offers a durable and long-lasting structure with a warm and authentic appearance.

Its modular design allows flexible configuration, while the open-top surface and integrated storage areas provide easy product placement and quick access.

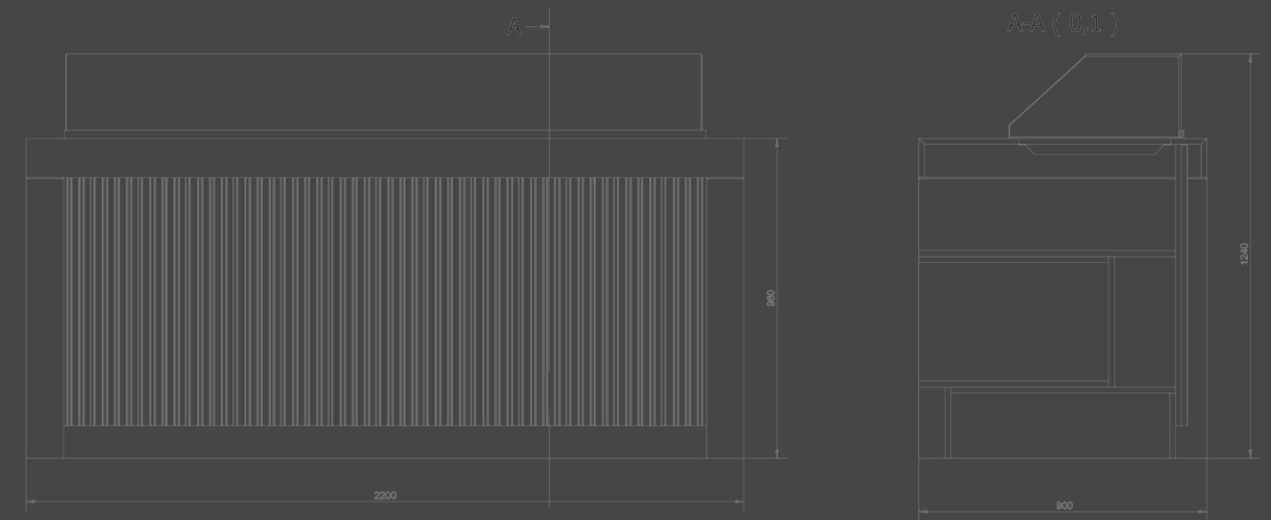

FORNEXA

Designed for hot food display and service, this unit features an integrated induction heating system that maintains pizzas at an optimal serving temperature between 60-80°C.

The glass-covered display area ensures hygienic presentation while keeping sliced and whole pizzas warm, fresh and ready to serve.

The extended side counter provides a dedicated workspace for packaging and sales, creating a seamless and efficient service flow.

PIZZA BULLS

- Four Cheese
- BBQ Chicken
- Slice Pizza
- Whole Pizza
- Combo Menu
- Soft Drinks

CERCIS

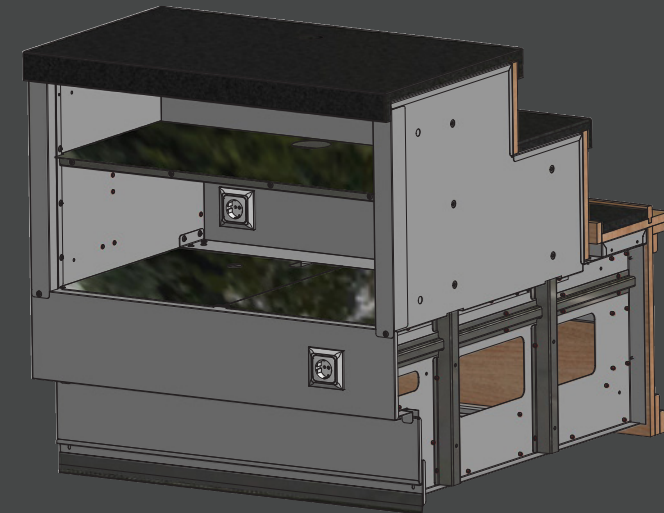

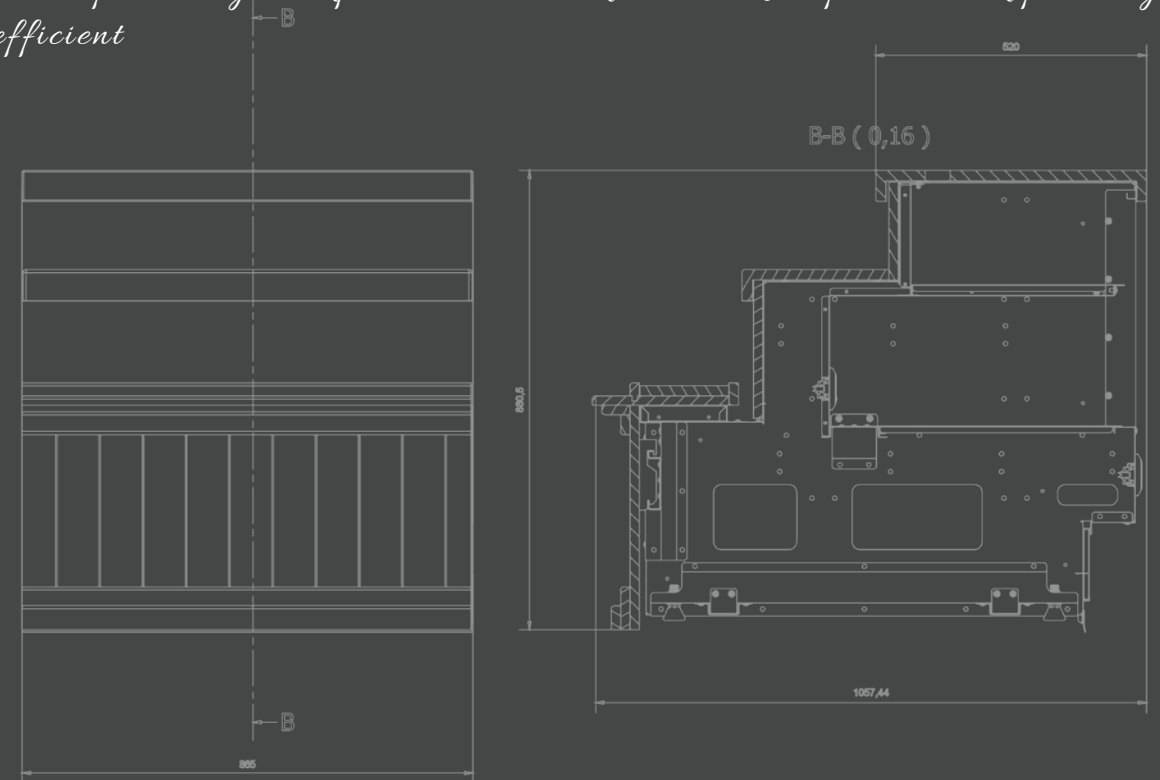

Designed as an open-access bottle cooler, it maximizes product visibility and easy reach. Integrated cooling ensures beverages remain consistently chilled and ready to grab. Maximizes product visibility with an open display concept and structured shelving system. Integrated cooling ensures consistent freshness while enhancing overall sales performance.

CASHIXIA

Designed as a dedicated checkout platform, this unit provides an elevated and ergonomic base for POS systems and cash registers. Its modular metal structure allows seamless installation while optimizing workflow at the checkout area. Keeps the workspace organized, clean, and efficient

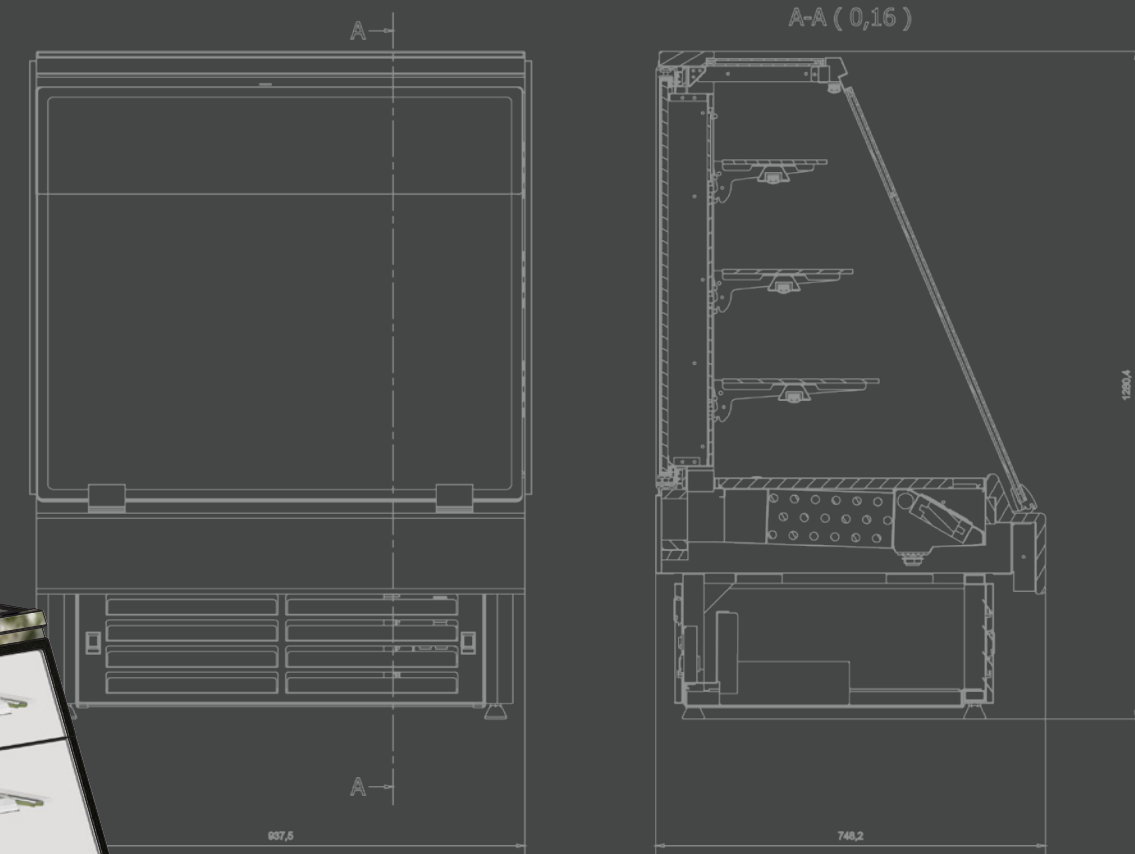

CARPINUS

Designed as a closed refrigerated display for sandwiches and desserts, featuring rear swing doors for fast and hygienic staff access.

Integrated cooling ensures consistent freshness, The glass-front presentation enhances visibility, while advanced cooling maintains optimal freshness at all times.

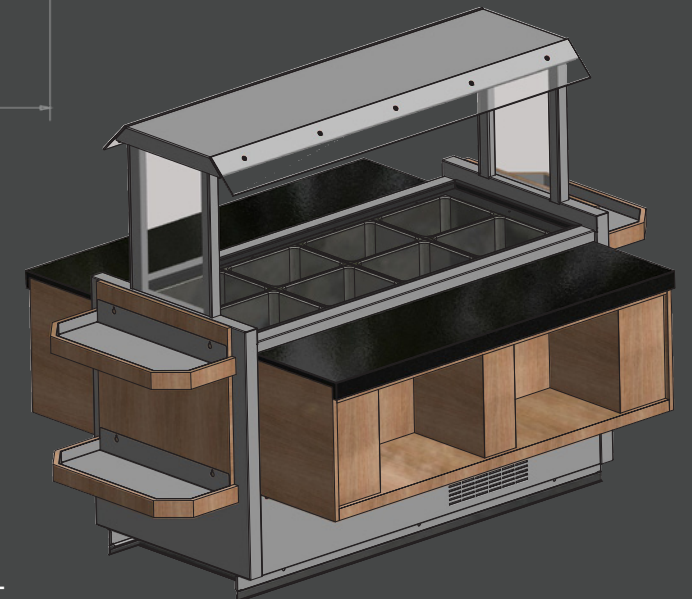

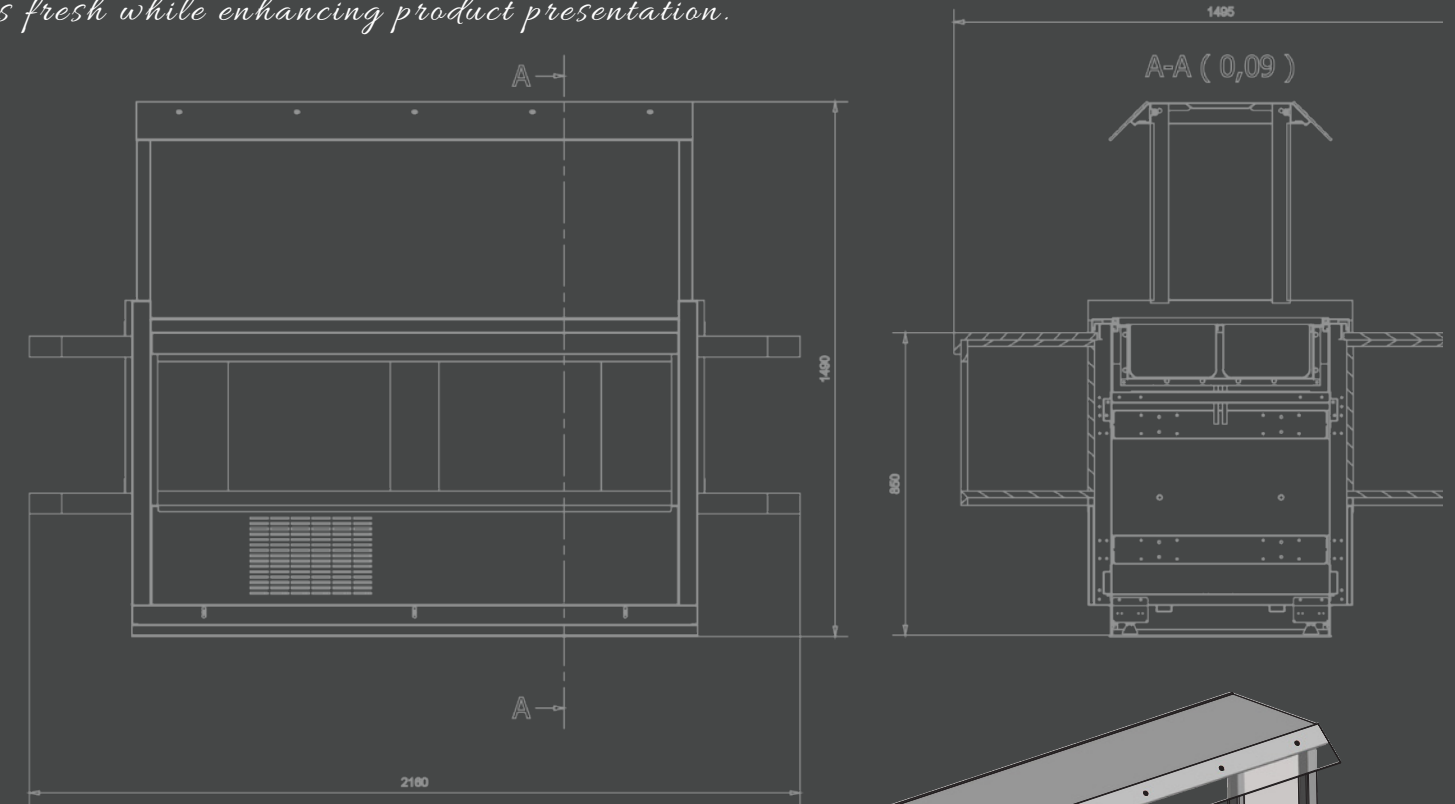

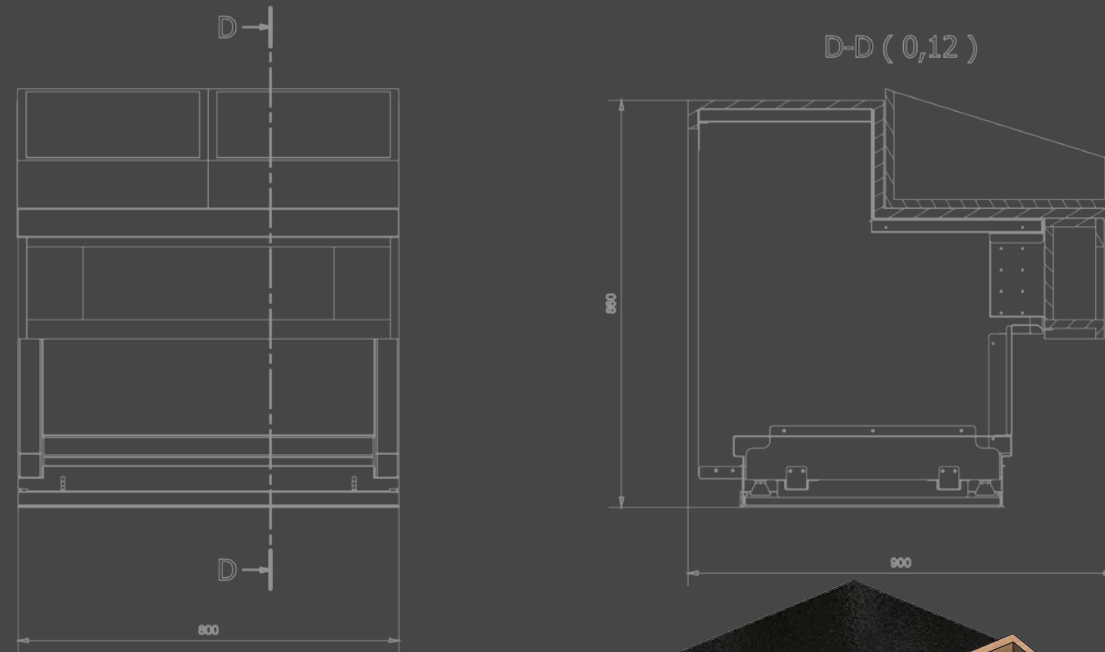

FRESORA

Designed as a self-service salad bar, this unit features integrated refrigerated GN pans to keep fresh ingredients at optimal serving temperature. It keeps products fresh, visible, and ready to serve. For efficient self-service, it keeps ingredients fresh while enhancing product presentation.

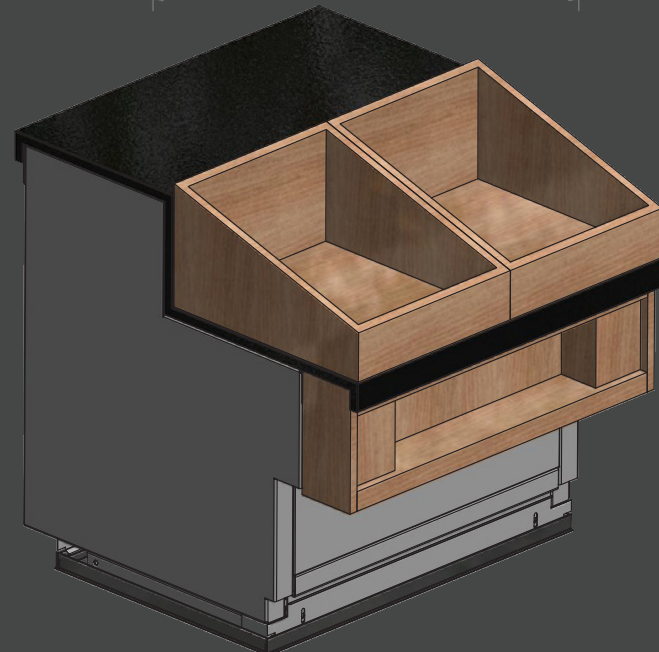

LIGNORA

Engineered with a robust metal structure, this service counter features a durable granite work surface and integrated wooden modules for display and storage. Its modular design supports efficient workflow while maintaining a clean and professional service environment.

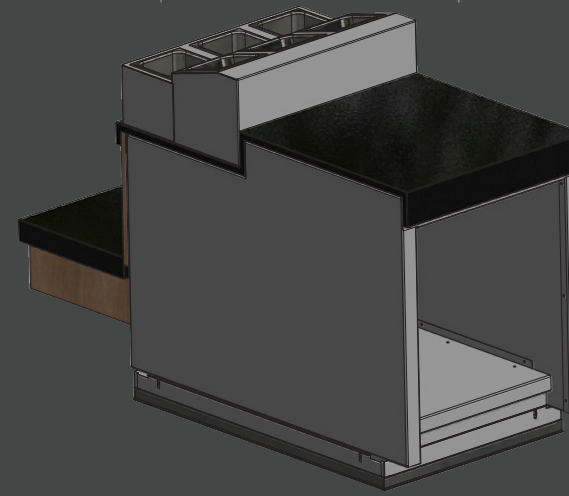

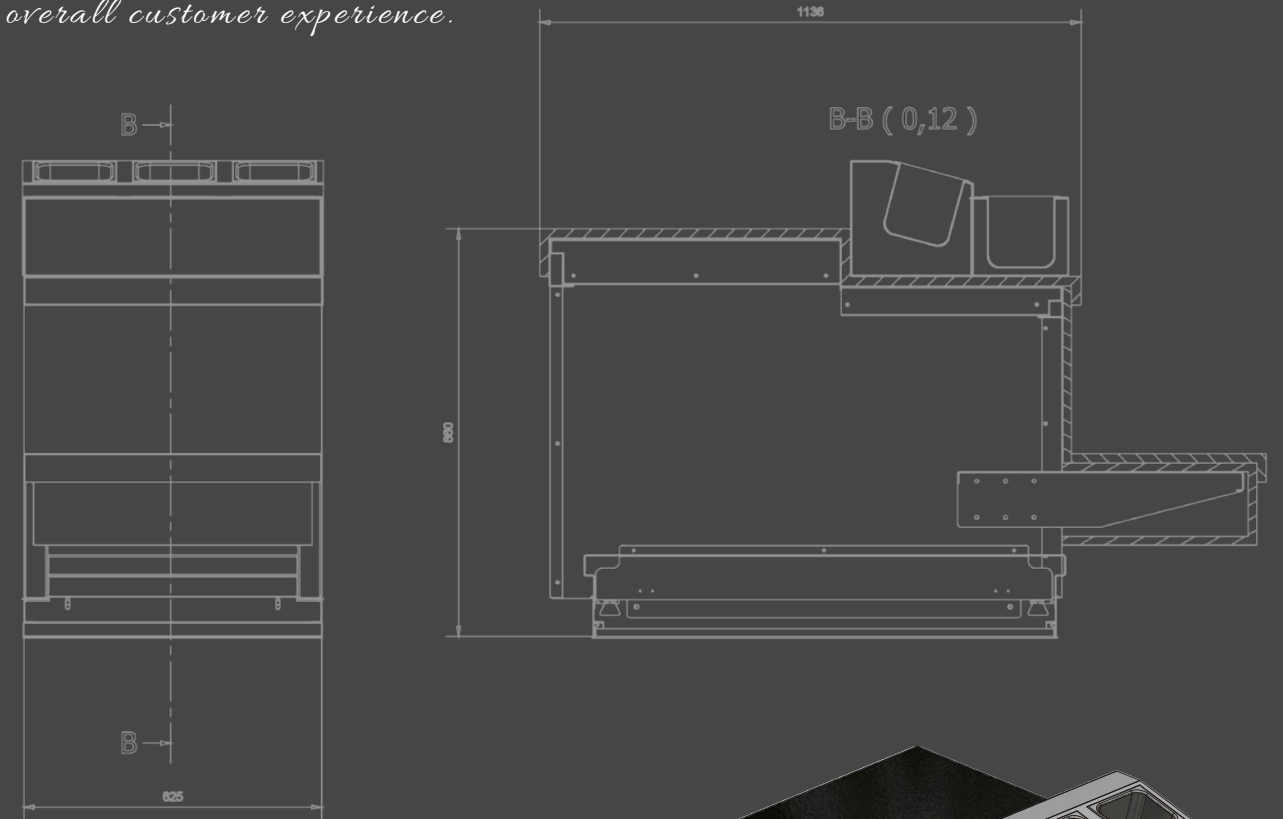

-50-

TRAYORA

Designed for self-service areas, this counter integrates dedicated compartments for cutlery and tray placement to support an organized and efficient flow. The granite top provides durability and hygiene, while wooden finishes add warmth and enhance the overall customer experience.

-51-

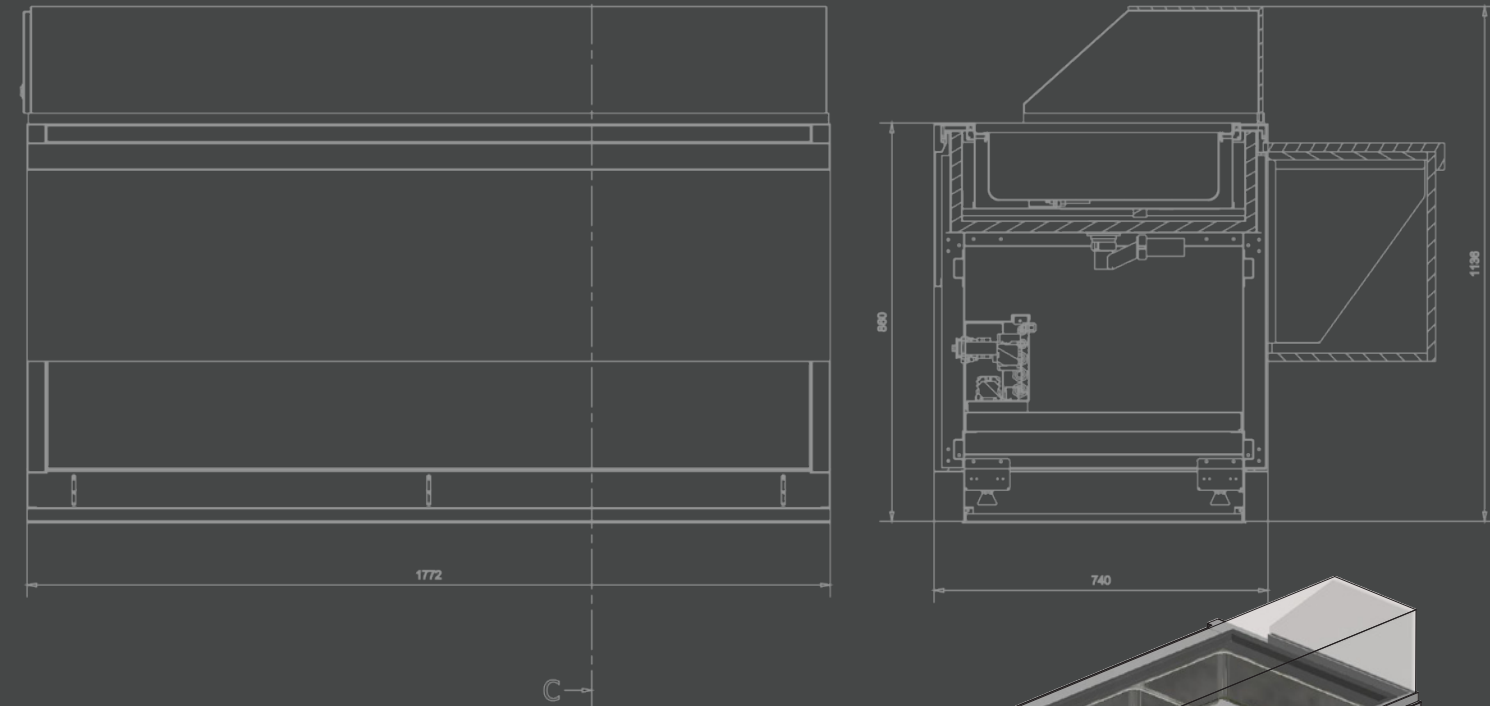

THERMORA

A reliable hot food display solution that keeps meals warm, fresh, and ready to serve. Combines strong heating performance with clear product visibility to improve customer experience. Optimized for operational efficiency, the unit allows seamless service with accessible layout and organized GN system.

Non-porous surfaces and cleanable components provide fast and hygienic maintenance

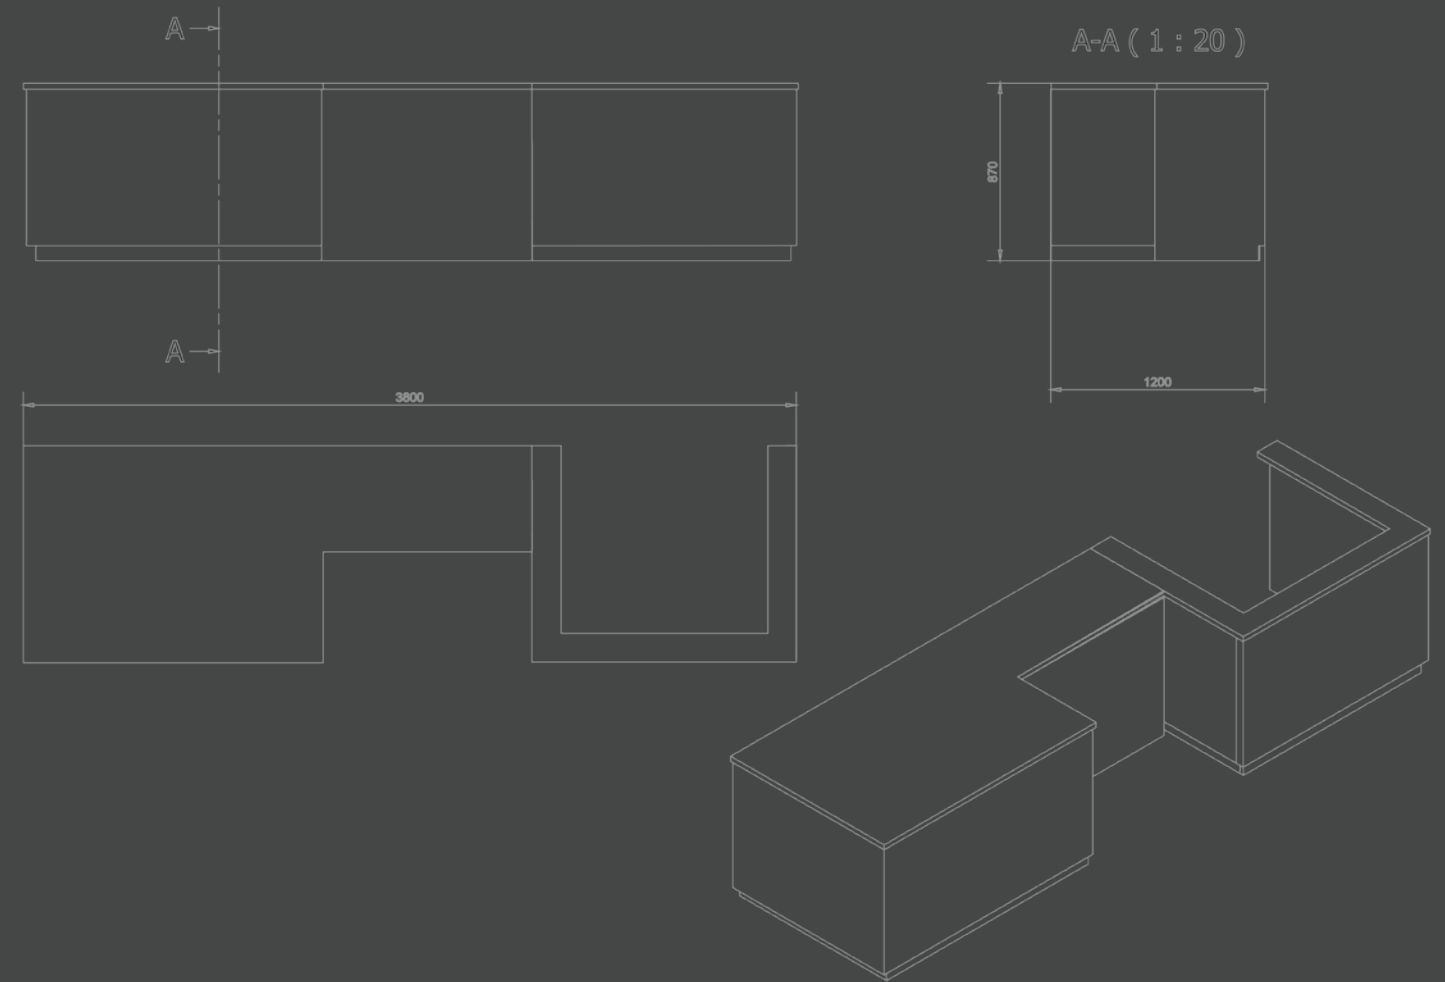

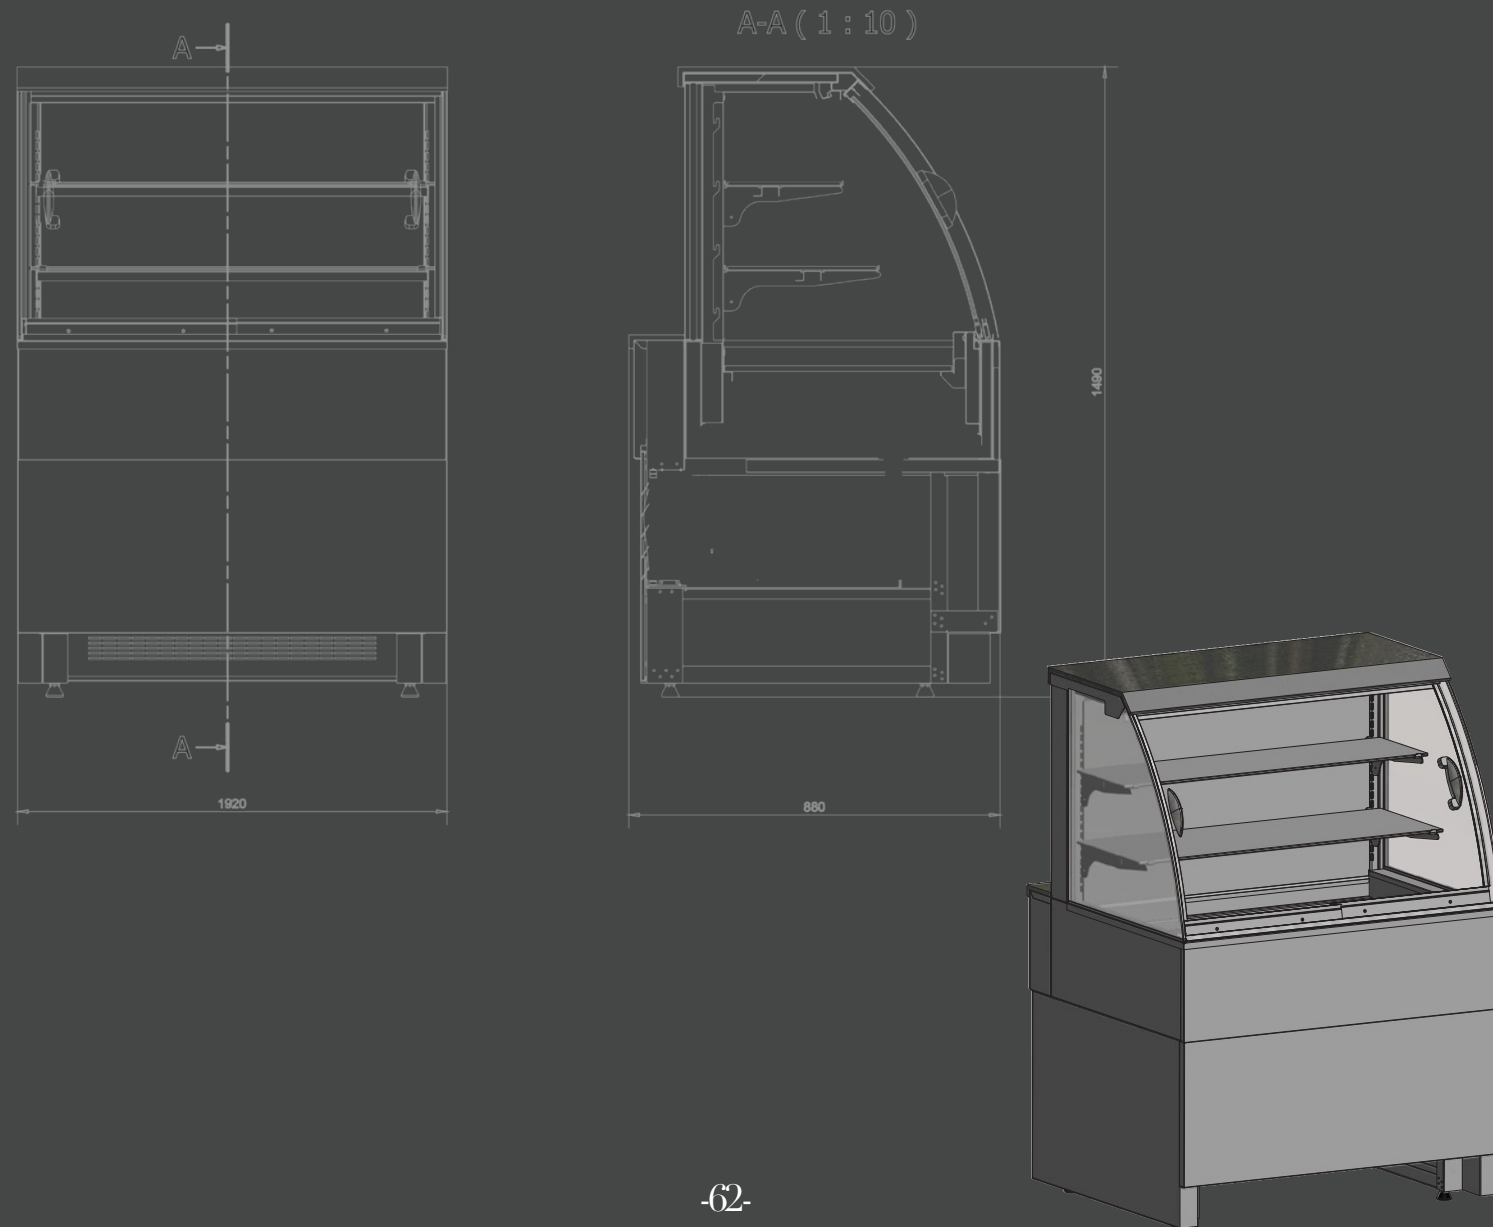

BANKOS

Custom-designed in line with project-specific architectural concepts, these sales counters are produced using carefully selected materials defined by the design team. Robust construction and high-quality finishes ensure long-lasting performance while maintaining a refined retail identity.

OPT_DVN

Designed for in-counter use, this grab & go display unit features a curved sliding glass system that combines hygienic presentation with easy access. Its integral cooling system ensures consistent temperature control, keeping sandwiches and beverages fresh and ready to serve.

JUPITER

Designed for narrow aisles and compact stores, this wall-mounted refrigerated display unit features sliding doors for space-efficient operation. Its integral cooling system ensures stable temperature performance while maximizing product visibility in limited spaces.

PATARA VADI

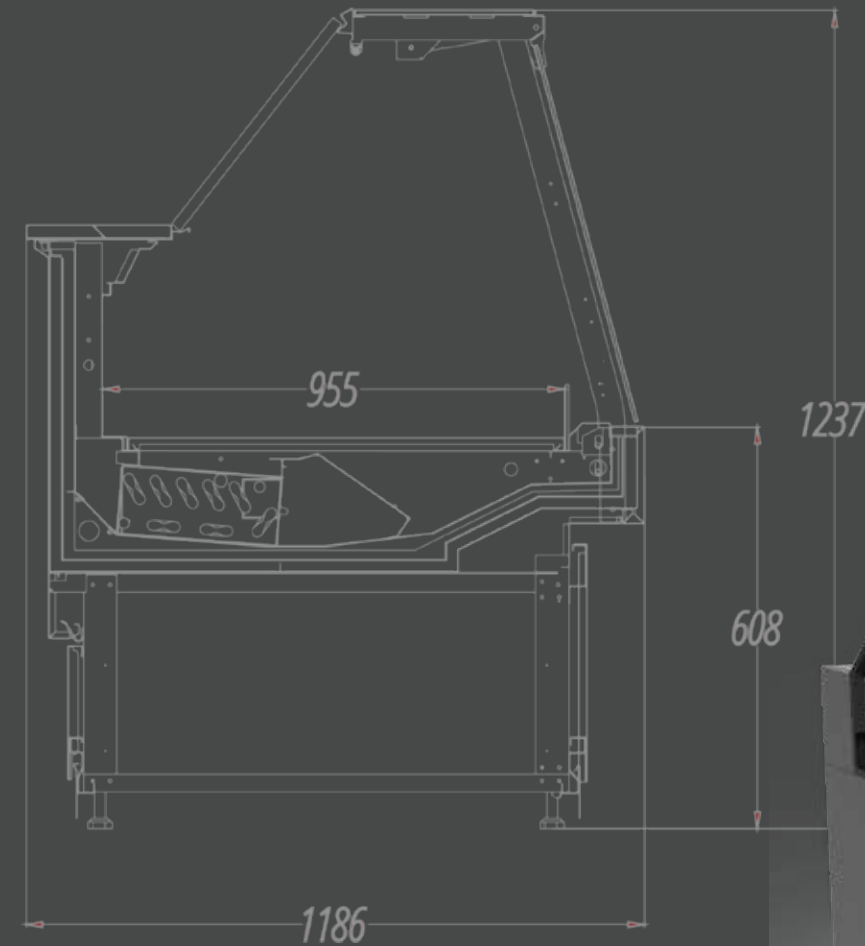

Designed for restaurants, self-service areas, and retail food sales, this versatile display cabinet is ideal for desserts, beverages, and cold appetizers. Rear loading allows staff to replenish products quickly and efficiently, while front access enables customers to easily select and take products themselves. Wide glass surfaces and organized shelving provide clear product visibility, attractive presentation, and smooth service flow.

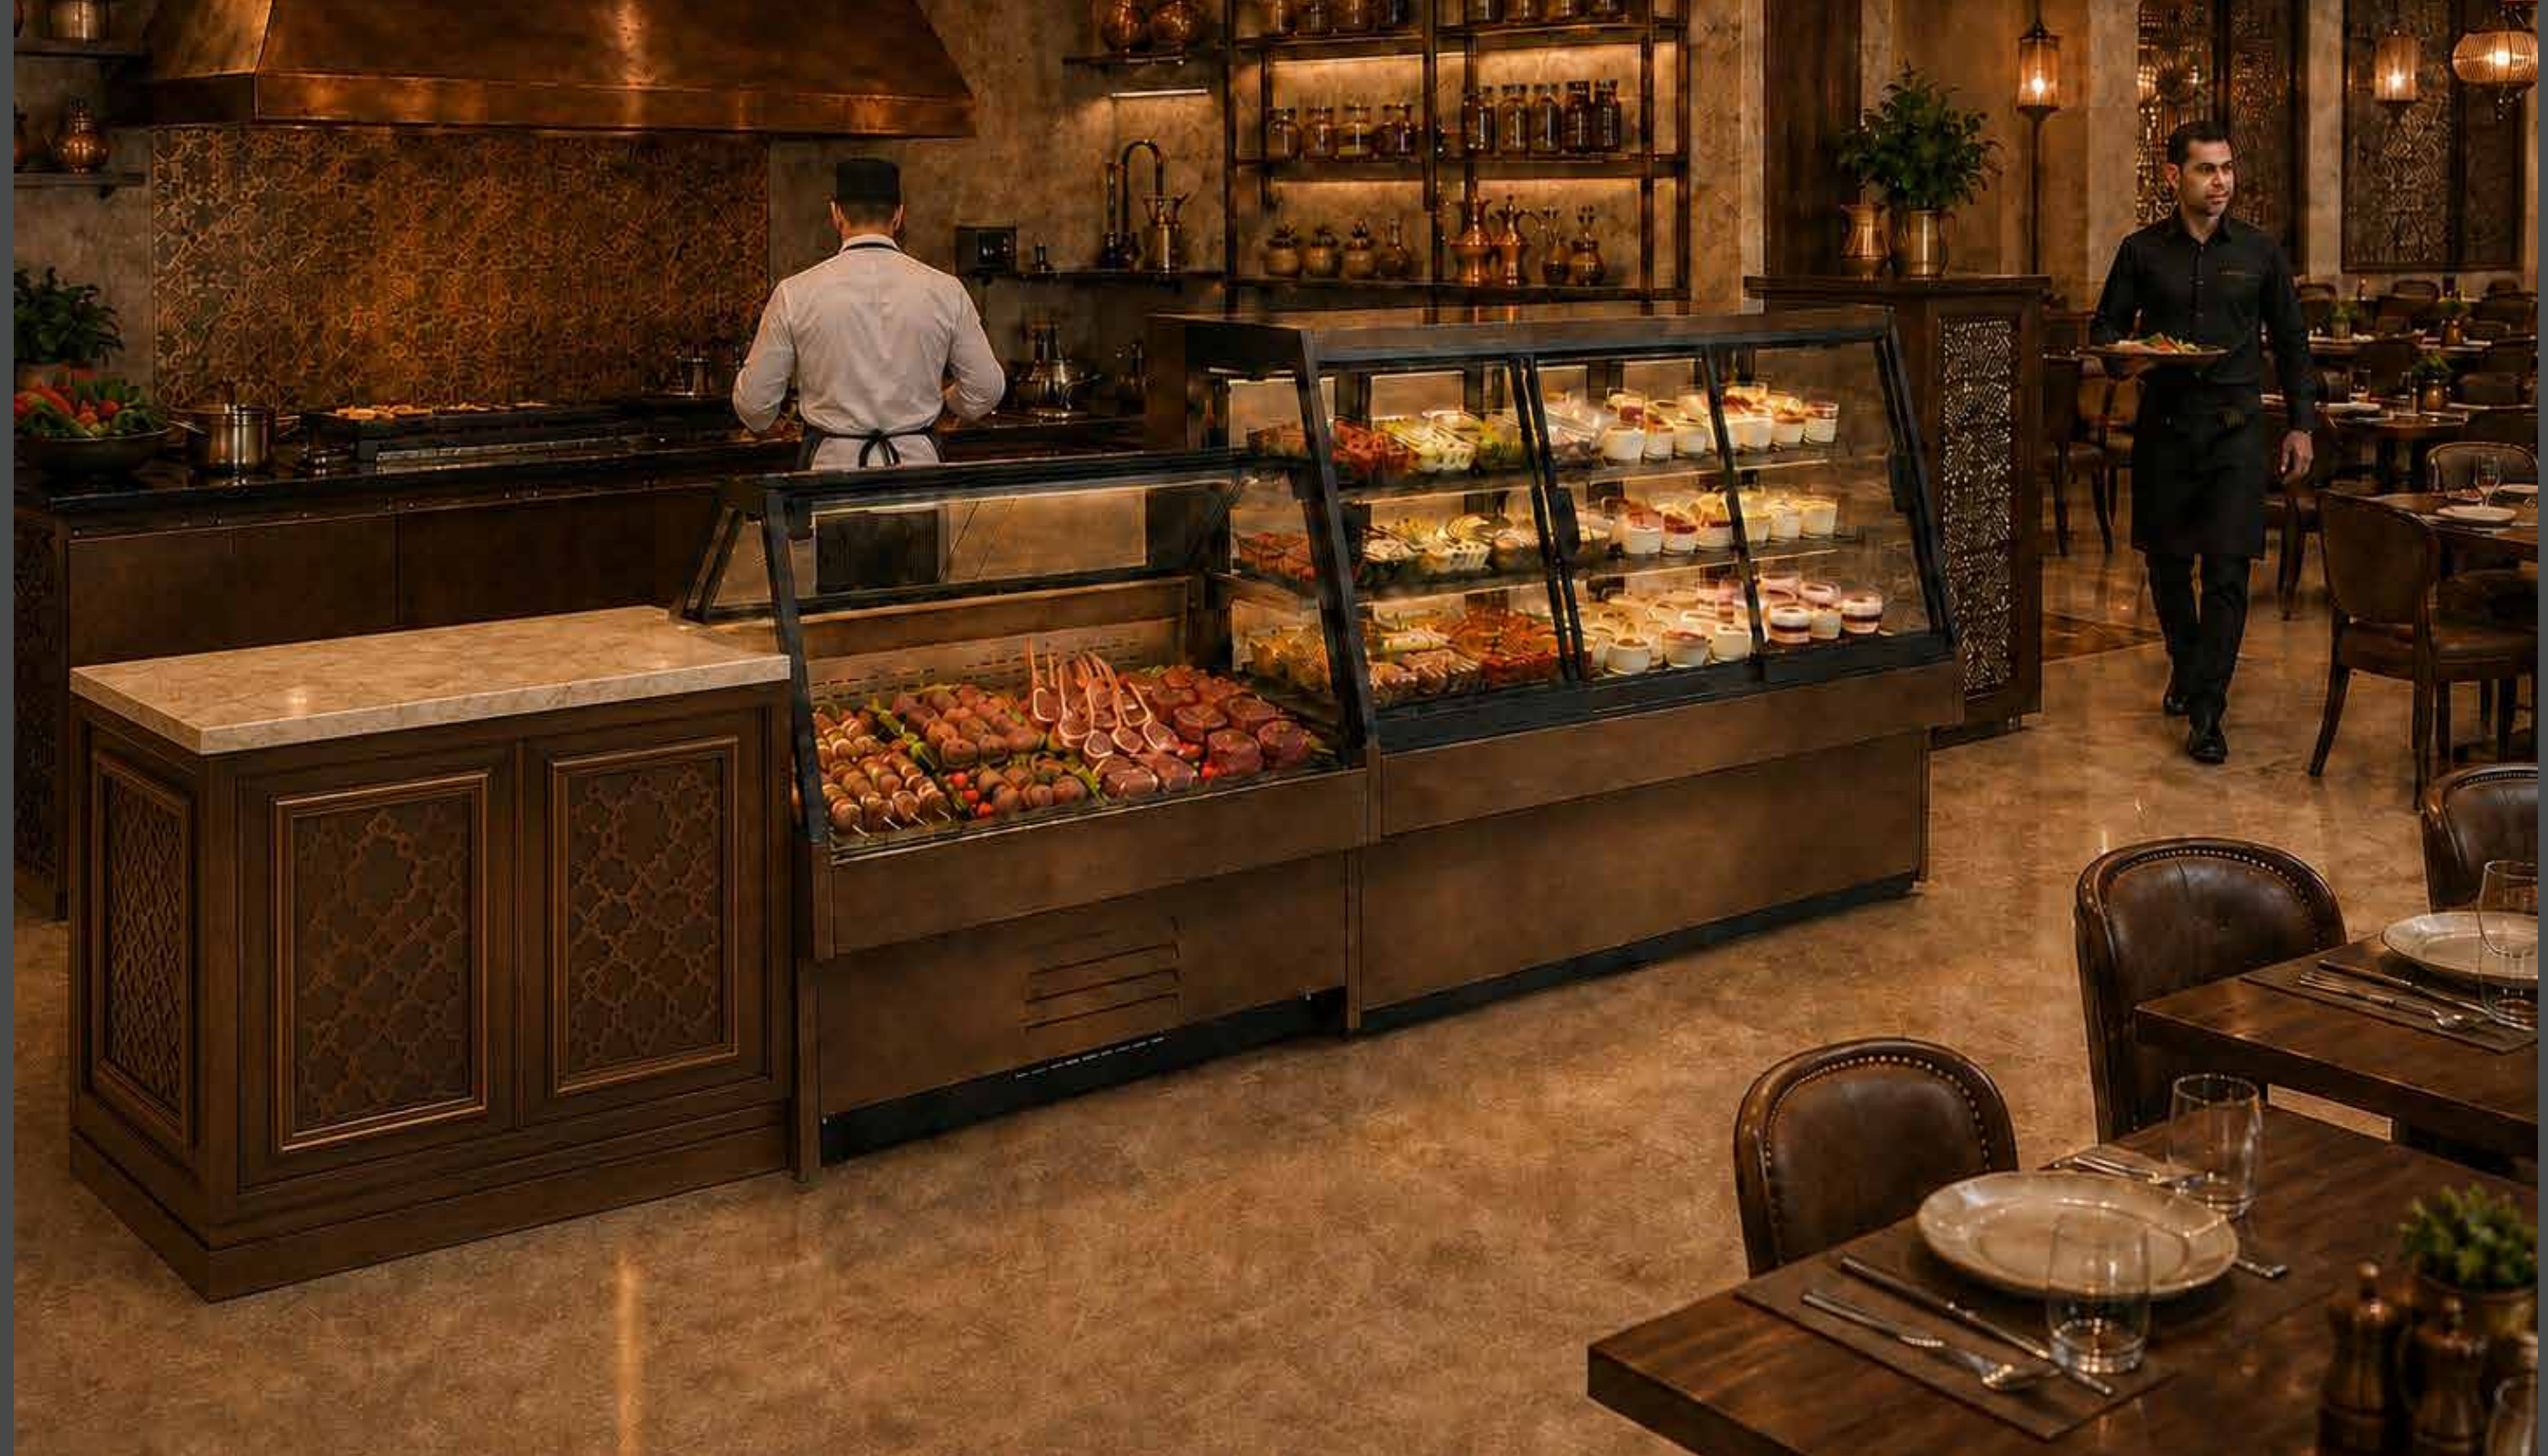

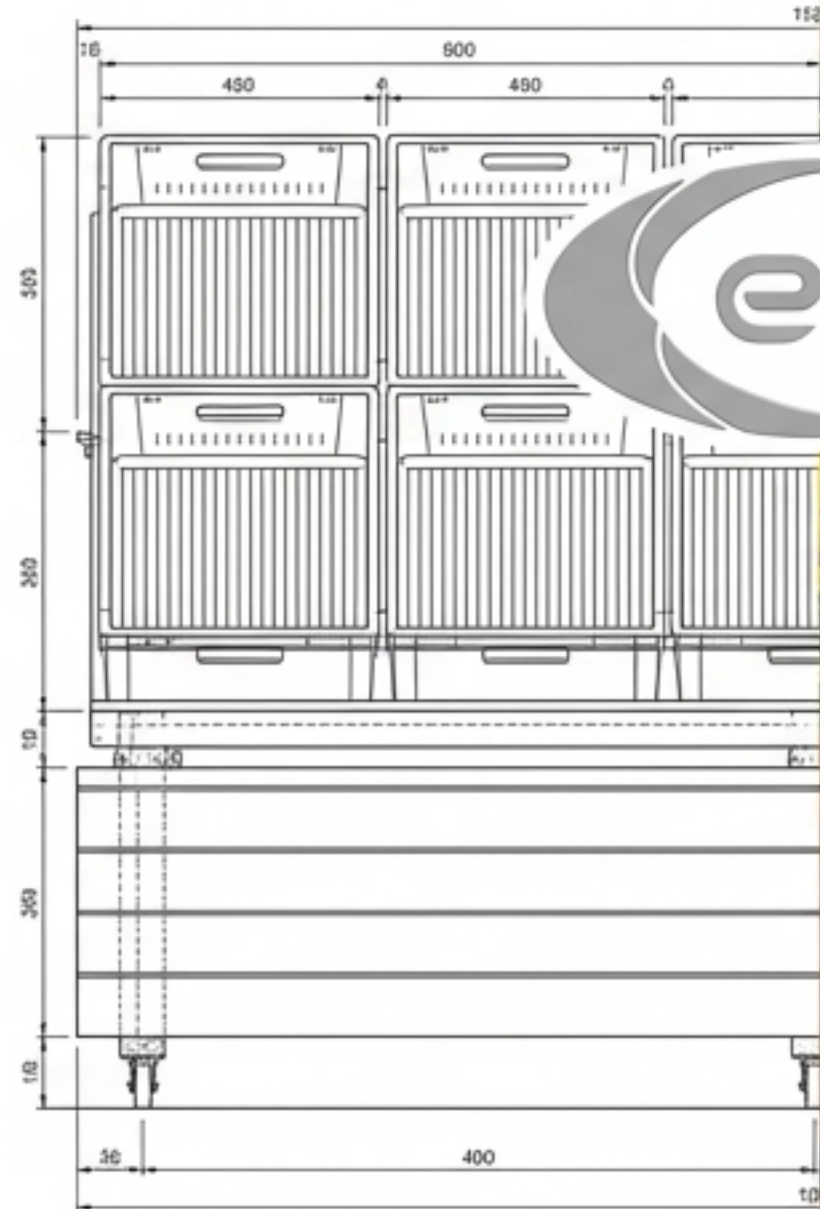

SOLDIS VADI

Specially designed for meat display, this cabinet provides hygienic presentation, excellent visibility, and organized product placement. Its spacious service area and easy-access interior make daily operation, cleaning, and maintenance fast and practical. Optimized air circulation and precise refrigeration help maintain ideal storage conditions, preserving the freshness and quality of meat products.

Doğal malzemeler. Modüler mühendislik.
Ödünsüz dayanıklılık.

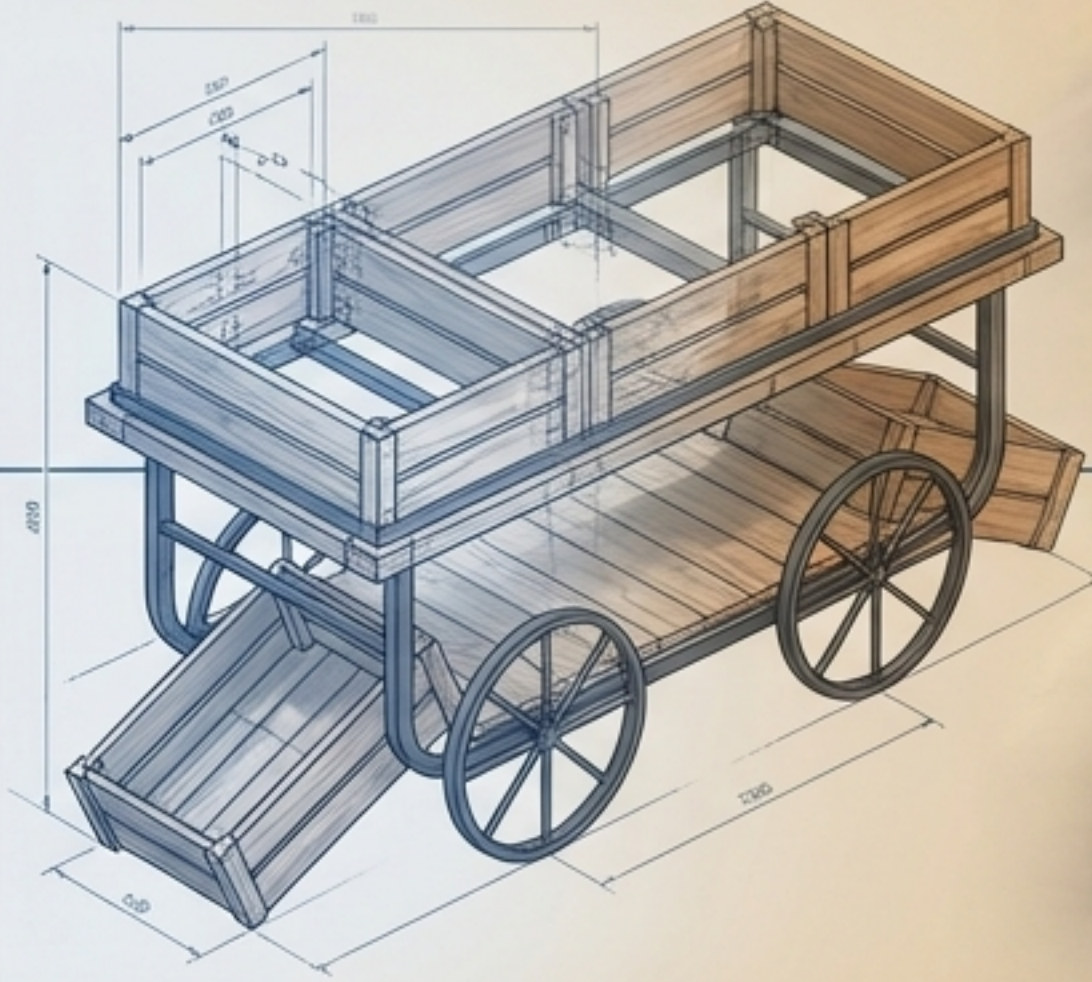

Mimarın Eskizinden Zanaatkar Pazarına

1. Modüler Üretim

Hızlı kurulum, lojistik verimlilik,
kompakt paketleme.

2. Yapısal Mukavemet

Endüstriyel metal iskelet ve
doğal ahşap entegrasyonu.

3. Görsel Estetik

Müşteriyi içeri çeken sıcak,
davetkar ve otantik pazar atmosferi.

Güzelliğın Altındaki Güç: Demonte Sistem Anatomisi

[Taşıyıcı Profil]

Maksimum yük kapasitesi için endüstriyel metal.

[Geçmeli Ray Sistemi]

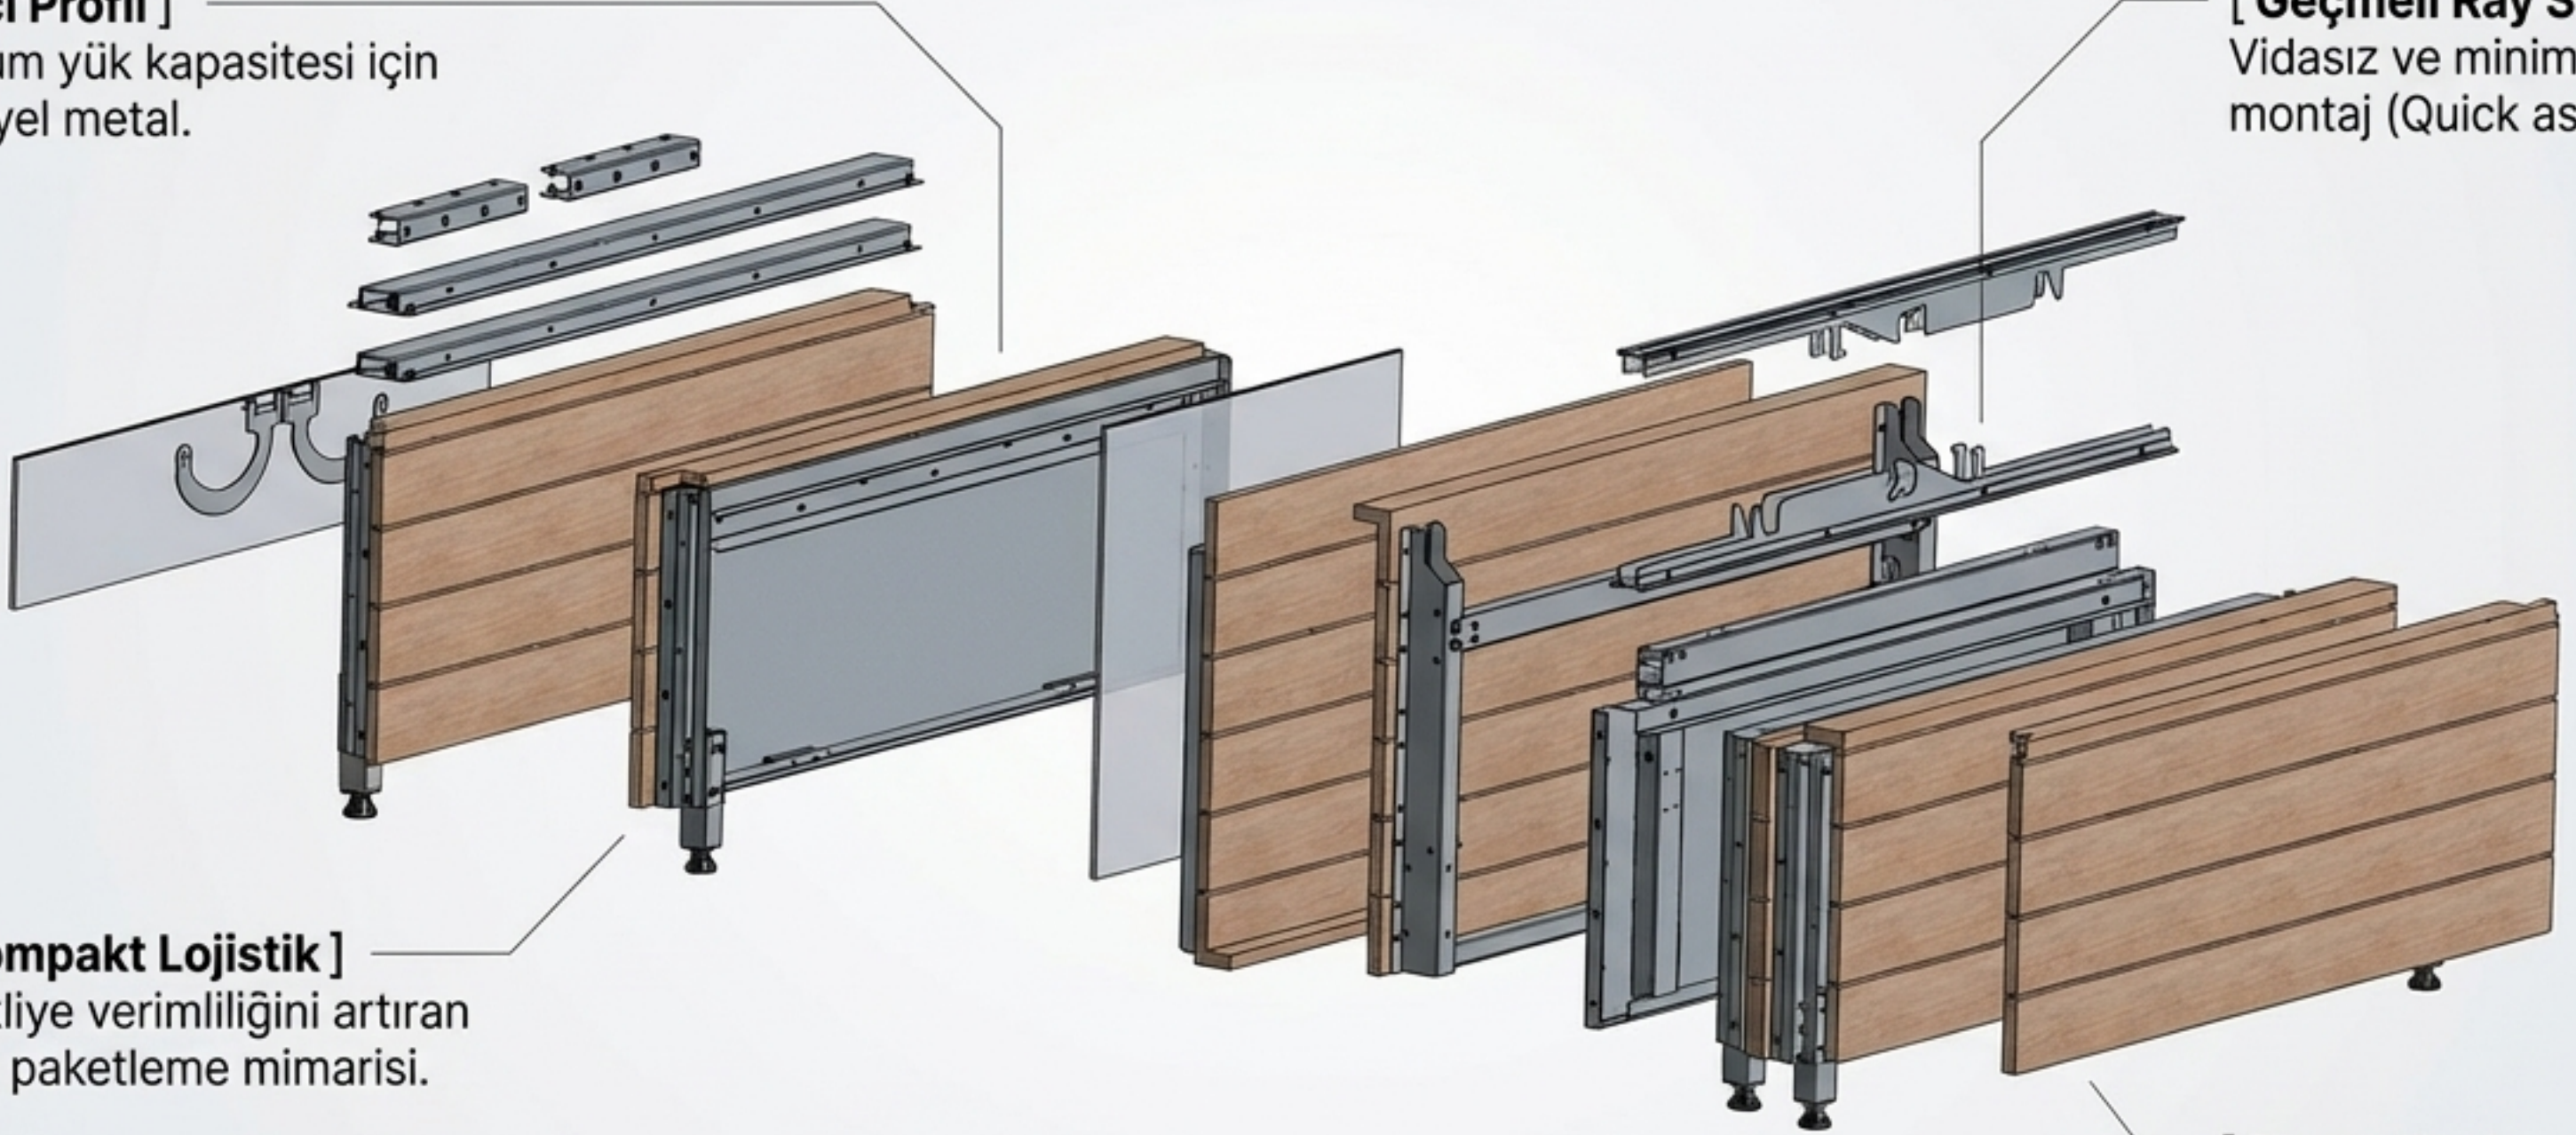

Vidasız ve minimum aletle hızlı montaj (Quick assembly).

[Kompakt Lojistik]

Nakliye verimliliğini artıran düz paketleme mimarisi.

[Ahşap Kaplama Panel]

Estetik bütünlük sağlayan doğal doku.

Mağaza İçi Görşel Ritim ve Ergonomi

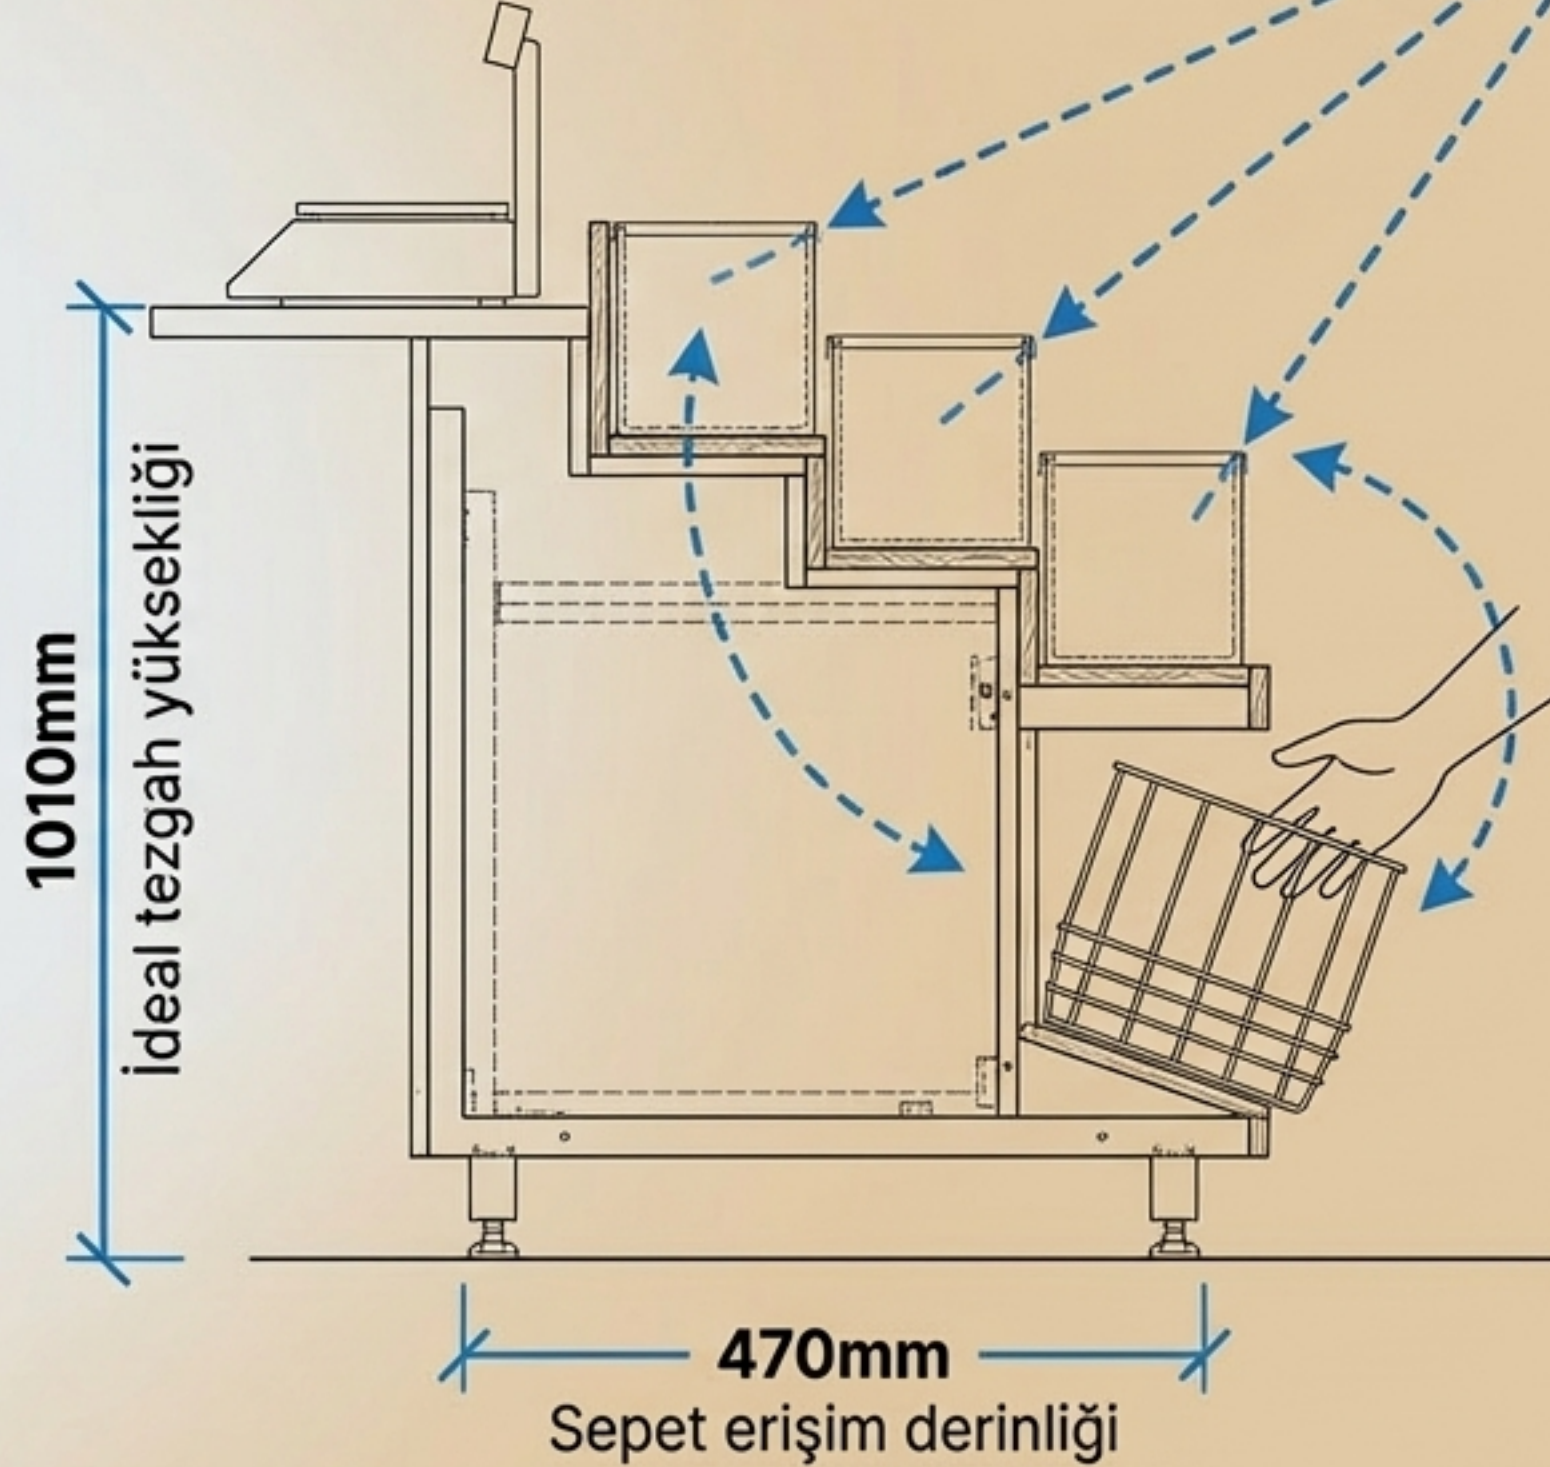

Problem:

Neden Eğimli Raf?

Çözüm Şeması:

Eğimli katmanların sağladığı doğrudan göz teması ile artırılmış ürün görünürlüğü ve hızlı operasyonel yenileme (Quick Replenishment).

Taze Ürün Ekosistemi

1

ISOLA & PANOVA

Doğal malzemeli, bağımsız ada (Island) üniteler. 360 derece erişim.

2

EDULIS & VERDORA

Modüler, esnek ve hızlı yenilenebilir duvar/köşe üniteleri.

3

AGRONA

Ahşap detaylı, yüksek taşıma kapasiteli metal sirkülasyon sistemleri.

Her ürün için optimize edilmiş eğimli sunum ve kolay operasyon.

Unlu Mamuller: Duyusal Bir Deneyim Alanı

Merkez (Centerpiece)

[Merkez: PANOVA]

Otantik ahşap ada. Katmanlı yapısıyla ürün dokusunu öne çıkarır.
(Sensory Retail Experience)

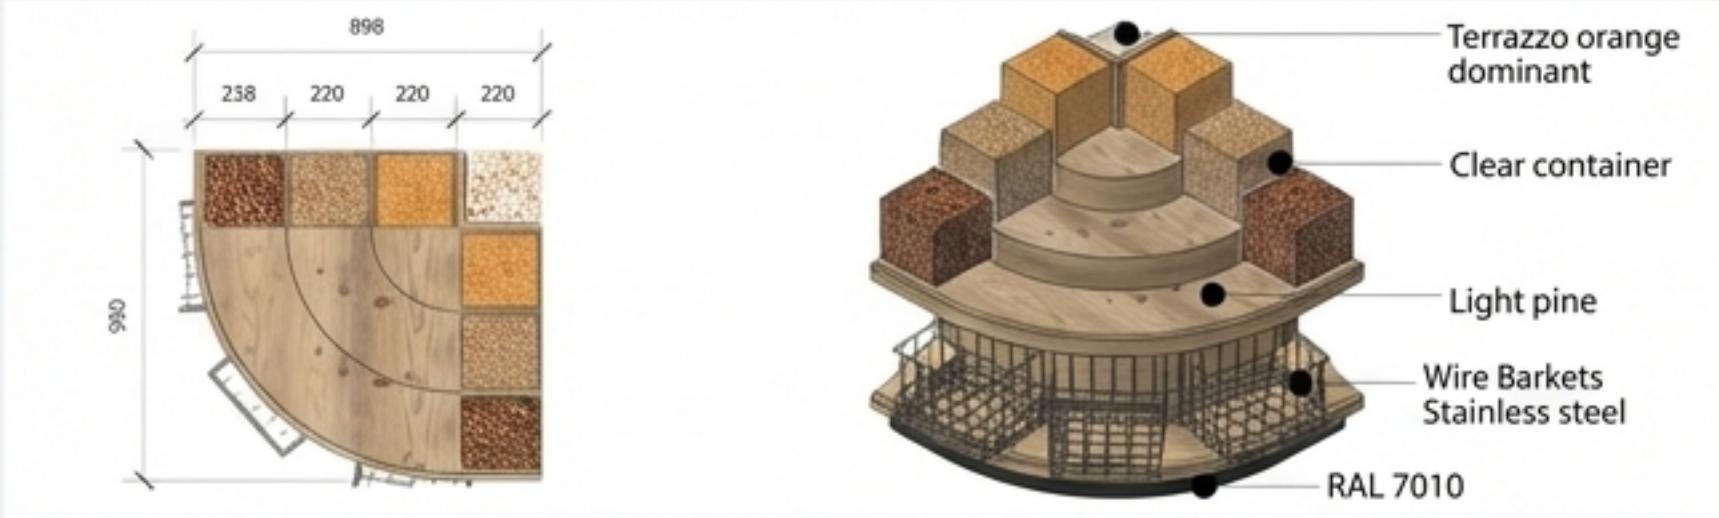

Çevre (Perimeter)

[Çevre: GRANORA & PANEXA]

Akıllı Modüler Yapı. Çok katmanlı tel raflar, temiz paketli ürün sunumu.
(Maksimum görünürlük, organize düzen)

Dökme Gıda: Şekillendirilmiş Düzen

GRANELA

Doğal ahşap gövde, granit yüzey. Basamaklı (tiered) form ile zengin bir görsel derinlik yaratımı. Alt kısımdaki entegre paslanmaz çelik tel sepetler.

NUTREX

Duvar ünitesi çözümü. Entegre tabela panelleri, temiz ve dengeli bir mağaza akışı için tasarlanmış katmanlı raf mimarisi.

Şarap ve Gurme: Dikey Zarafet

Optimum Aç

Şişelerin etiketlerini okumayı kolaylaştıran ergonomik eğim.

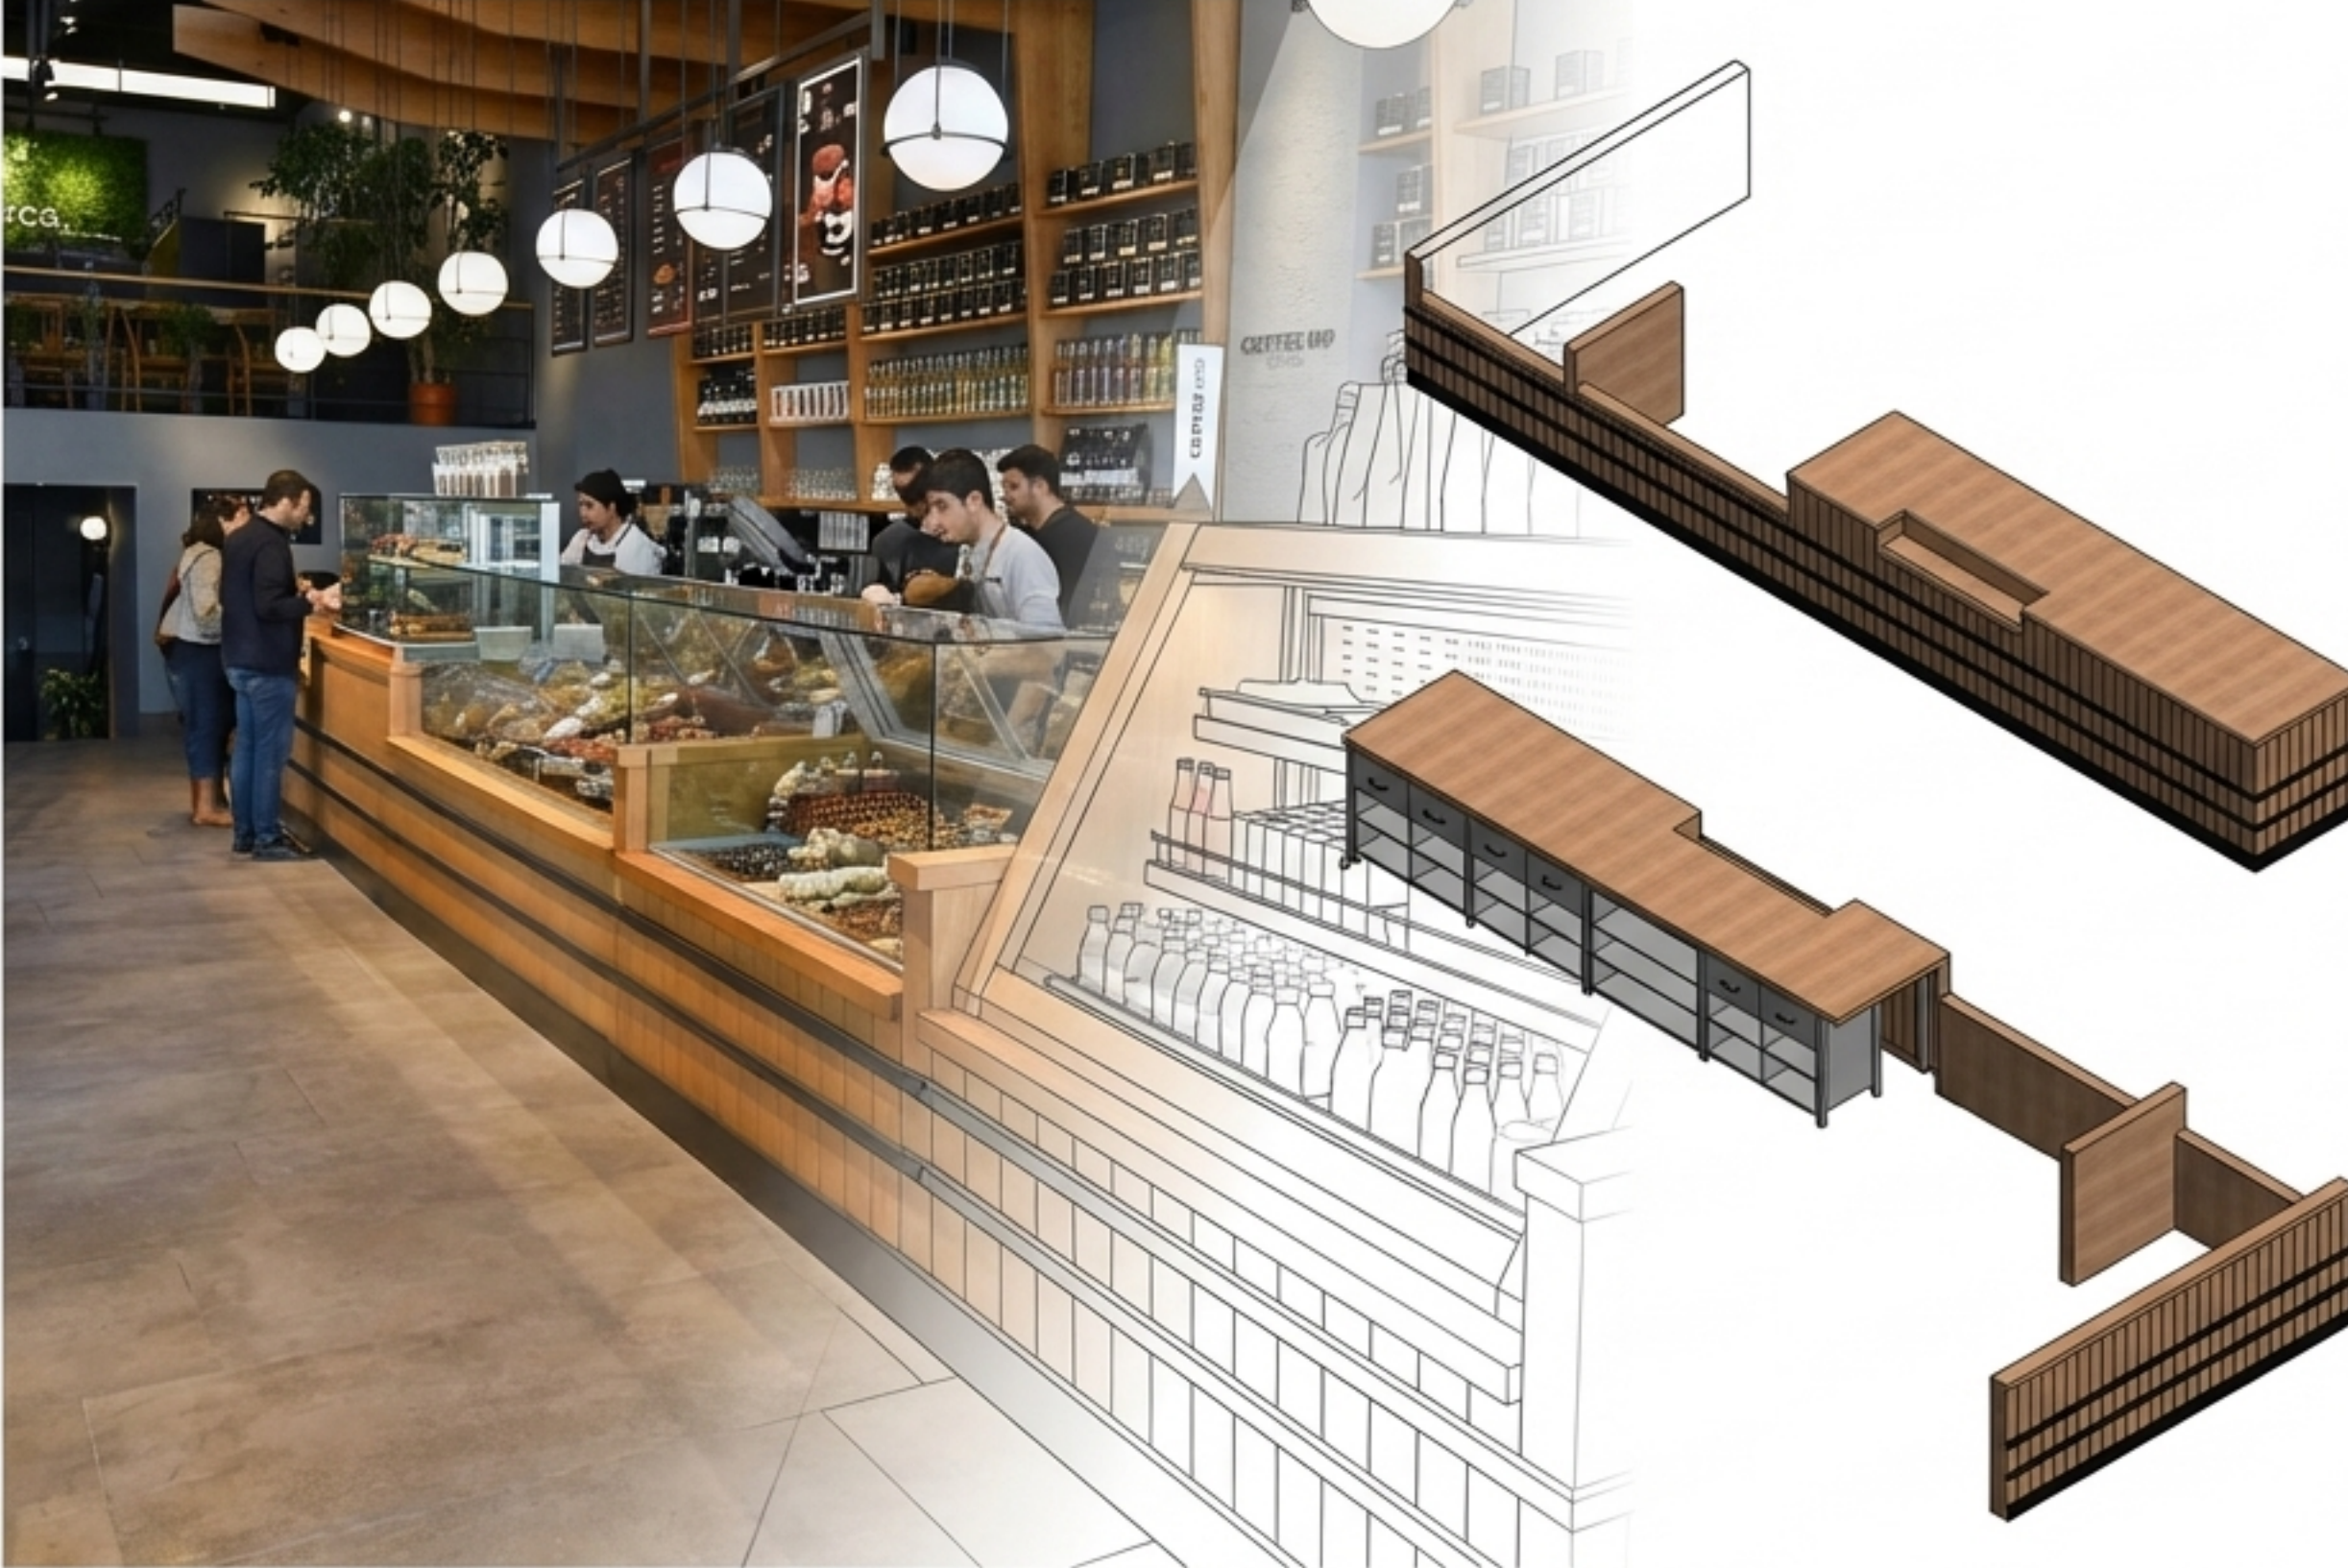

Derinlik ve Ritim

Entegre aydınlatma ve sıcak ahşap dokuların dikey alanı dönüştürmesi.

Merkez Ada

Bağımsız kutu formları ve katmanlı ada tasarımıyla çapraz satışı destekleyen modüler yapı.

Hizmet Alanları ve Akış Yönetimi

Operational Process

GUSTEXA: Arka Alan Gücü

Özel alanlara uyum sağlayan, endüstriyel dayanıklılık ile doğal dokuyu birleştiren banko sistemi. Kusursuz çalışma ortamı.

BREXIA & TRAYORA: Ön Alan Etkileşimi

Kafelerde anlık satın almayı teşvik eden heykelsi tasarımlar. Çatal-bıçak ve tepsi düzeni için entegre kompartımanlar.
